We Can Teach That Ewa Dziedzic-Elliott, 2024-11-28 Information literacy is a complex subject that finally arrived at the doorstep of school libraries. For decades, academic researchers have been trying to capture the essence of information literacy, its educational, cognitive, and civic value. The collection of book chapters offered in *We Can Teach That* is a handbook that can be used as an inspiration for teaching various types of literacy: visual, digital, multicultural, health, and more. The book asks important questions: When do we start teaching information literacy? How do we teach it? How does it affect our students at their education level? How does it prepare them for their post-high school adult life? Does it impact their transition to college or career? Dziedzic-Elliott and her collaborators provide a range of best practices and concepts that inspire thinking about teaching information literacy at all levels. Although written with school librarians in mind, the book can be easily adapted by teachers, school administrators, and even public librarians who are looking to incorporate information literacy elements in their daily practices. The book challenges the reader to rethink what they know about digital or tech literacy, breaks some stereotypical concepts about multicultural literacy, and highlights the importance of literacies even in adulthood.

Navigating the Data Minefields Scott M. Shemwell, 2025-06-13 Volumes have been written on the need for high quality data to support organizational decision making. Most of those books appear to focus on the development and sustainment of data from the standpoint of those directly responsible for the management of data stores and the use of technology necessary to acquire, store, and secure data sets. *Navigating the Data Minefields: Management's Guide to Better Decision Making* provides executives and subject matter experts (SMEs) with a reasonable set of useful tools they can adapt to their specific organization and operating environment. While complexity can never be taken out of an integrated system, decision making can be facilitated by using metrics that take into consideration the quality of the data used to make decisions, i.e., risk mitigation. Professionals who depend on large, high quality data sets, such as senior and mid-level management, engineering, SMEs, data scientists, IT systems engineers, and medical professionals, will want to have this book in their decision making arsenal. *Computer-Human Interaction Research and Applications* Hugo Plácido da Silva, Pietro

Cipresso, 2025-03-07 This two-volume set, CCIS 2370 and CCIS 2371, constitutes the proceedings of the 8th International Conference on Computer Human Interaction Research and Applications (CHIRA 2024) held in Porto, Portugal, during November 21-22, 2024. The 16 full papers and 45 short papers presented in these volumes were carefully reviewed and selected from 76 submissions. These papers focus on the research advancements and practical applications within various areas in the field of Computer Human Interaction, including Human Factors and Information Systems, Interactive Devices, Interaction Design, and Adaptive and Intelligent Systems. **Flying Magazine**, 1952-10 **Social Media Strategy** Keith A.
