The Leading Economic Indicators and Business Cycles in the United States John B. Guerard, 2022-07-06 In a time of unprecedented economic uncertainty this book provides empirical guidance to the economy and what to expect in the near and distant future Beginning with a historic look at major contributions to economic indicators and business cycles starting with Wesley Clair Mitchell 1913 to Burns and Mitchell 1946 to Moore 1961 and Zarnowitz 1992 this book explores time series forecasting and economic cycles which are currently maintained and enhanced by The Conference Board Given their highly statistically significant relationship with GDP and the unemployment rate these relationships are particularly useful for practitioners to help predict business cycles Load Balancing: An Automated Learning Approach Pankaj Mehra, Benjamin W Wah, 1995-04-26 This book presents a system that learns new load indices and tunes the parameters of given migration policies The key component is a dynamic workload generator that allows off line measurement of task completion times under a wide variety of precisely controlled loading conditions The workload data collected are used for training comparator neural networks a novel architecture for learning to compare functions of time series and for generating a load index to be used by the load balancing strategy Finally the load index traces generated by the comparator networks are used in a population based learning system for tuning the parameters of a given load balancing policy Together the system constitutes an automated strategy learning system for performance driven improvement of existing load balancing software Economic Analysis Robert D.
