Natural Turf for Sport and Amenity W. A. Adams, R. J. Gibbs, 1994 This book describes our current knowledge of soils and turfgrass science as applied to the design, production and management of natural turf. The first five chapters cover general principles while further chapters apply these to specific contexts. These include golf courses and bowling greens, soccer, rugby and cricket fields, as well as tennis courts and horse racing tracks. There are also chapters on amenity grass and warm season turfgrass. The book is aimed at students taking courses in turf science and sportsground management, amenity horticulture and landscape and recreation provision and management. It will also be a standard reference work for practitioners working in sportsground management or related subjects such as landscape architecture.

Horticulture: Plants for People and Places, Volume 2 Geoffrey R. Dixon, David E. Aldous, 2014-06-10 This Trilogy explains What is Horticulture. Volume two of Horticulture Plants for People and Places analyses in depth the scientific, managerial and ecological concepts which underpin Environmental Horticulture. Chapters describe Horticulture and the Environment, Woody, Ornamentals, Herbs and Pharmaceuticals, Urban Greening, Rural Trees, Urban Trees, Turfgrass Science, Interior and External Landscaping, Biodiversity, Climate Change and Organic Production. Each is written by leading international experts. Sustainable use of resources and careful conservation are critically essential for the continuation of life on this Planet. Achieving this is where horticulture, natural flora and fauna and the environment interact in achieving sustainable development. Horticulture is the fundamental partner of ecological and environmental science and provides an understanding of eco system services. Live plant networks are essential for rural and urban life. They are integral parts of natural communities, the context of historic and modern architecture and a means for rejuvenating cities and uniting communities. Plants provide urban, peri-urban and rural employment, business and tourism opportunities, leisure, rest and relaxation. These facets of Environmental Horticulture are clearly described in this book.
