Next of Kin Roger Fouts, Stephen Mills, 1998-09 In the tradition of *When Elephants Weep* comes the captivating story of the man who has made scientific history by talking to chimpanzees man s closest biological relative of photos

Chimpanzee Culture Wars Nicolas Langlitz, 2020-09-08 Decades later starting in the 1980s Japanese cultural primatology was given a second look as Euro American primatologists began to debate amongst themselves the question of whether *Homo sapiens* is the only cultural animal In the most recent chapter of this controversy field researchers such as the Swiss primatologist Christophe Boesch have accused experimental psychologists such as Michael Tomasello of underestimating and even denying the capacity of chimpanzees for culture because they limit their studies to captive animals brought up under cognitively debilitating conditions and tested in laboratory settings bound to favor human test subjects with whom the animals are compared These controversies raise serious questions about what sort of laboratory culture is best for the study of primate cognition **Critical Kinship Studies** Damien W. Riggs, Elizabeth Peel, 2016-09-15 This book draws together research on posthumanism and studies of kinship to elaborate an account of western human kinship practices Studies of kinship have increasingly sought to critique the normative assumptions that often underpin how caring relationships between humans are understood The categorisation of human and kinship is brought into question and this book examines who might be excluded through adherence to accepted categories and how a critical lens may broaden our understanding of caring relationships Bringing together a diverse array of analytic foci and theoretical lenses *Critical Kinship Studies* opens up new avenues for understanding what it means to be in relationships with others and in so doing challenges the human exceptionalism that has often limited how we think about family loss love and subjectivity *Creating Women's Theology* Monica A. Coleman, Nancy R. Howell, Helene Tallon Russell, 2011-09-22 *Creating Women's Theology* engages women s questions Can women from different religious traditions engage one theological approach Can one philosophical approach support feminist religious thought What kind of belief follows women s criticism of traditional Christianity *Creating Women's Theology* offers a portrait of how some women have found room for faith and feminism For the last twenty five years women religion scholars have synthesized process philosophy with their feminist sensibilities and faith commitments to highlight the value of experience the importance of freedom and the interdependence of humanity God and all creation

Lonsdorf,Stephen R. Ross,Tetsuro Matsuzawa,2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave The Mind of the Chimpanzee brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee
