Natural Connections Perspectives In Community Based Conservation

Timothy George Lauxmann

Natural Connections Perspectives In Community Based Conservation:

Natural Connections David Western, Michael Wright, 2013-03-19 Both realism and justice demand that efforts to conserve biological diversity address human needs as well. The most promising hope of accomplishing such a goal lies in locally based conservation efforts: an approach that seeks ways to make local communities the beneficiaries and custodians of conservation efforts. *Natural Connections* focuses on rural societies and the conservation of biodiversity in rural areas. It represents the first systematic analysis of locally based efforts and includes a comprehensive examination of cases from around the world where the community based approach is used. The book provides an overview of community based conservation in the context of the debate over sustainable development, poverty and environmental decline; case studies from the developed and developing worlds: Indonesia, Peru, Australia, Zimbabwe, Costa Rica, the United Kingdom; that present detailed examples of the locally based approach to conservation; a review of the principal issues arising from community based programs; an agenda for future action.

Natural Connections: Perspectives in Community-based Conservation

David Western, R. Michael Wright, Shirley C. Strum, 1994

Communities and Conservation J. Peter Brosius, Anna Lowenhaupt Tsing, Charles Zerner, 2005-07-21 The distinguished environmentalists in this collection offer an in depth analysis and call to advocacy for community based natural resource management (CBNRM). Their overview of this transnational movement reveals important links between environmental management and social justice agendas for sustainable use of resources by local communities. In this volume, leaders who have been instrumental in creating and shaping CBNRM describe their model programs, the countermapping movement and collective claims to land and resources, legal strategies for gaining rights to resources and territories, biodiversity conservation and land stabilization priorities and environmental justice and minority rights. This book will be of value to instructors, practitioners and activists in anthropology, cultural geography, environmental justice, environmental policy, political ecology, indigenous rights, conservation biology and CBNRM.

The DAC Journal Volume 2 Issue 4 OECD, 2002-03-26 The journal of the OECD Development Assistance Committee. This issue includes Development Co-operation Reviews of The United Kingdom and Germany as well as the DAC Joint Assessment of the Aid Programmes of Germany, The Netherlands and The UK in Mozambique and an article on Poverty, Enviro, Gender.

Ecology, Uncertainty and Policy John Handmer, 2017-09-29 A broad and comprehensive exploration of the role of the ecological sciences in sustainability for undergraduates. The urgent quest for more sustainable patterns of development has placed new and difficult demands on both scientists and policy makers as they seek to establish more informed and effective policy processes and management regimes in the face of pervasive uncertainty. Written by an international group of authors from a range of disciplines: ecology, geography, law, policy analysis and others, the chapters explore issues of scientific legitimacy, public participation, non-governmental organisations, inter-sectoral communication and pragmatic public policy across a wide range of ecosystem management contexts.

Sacred Natural Sites Bas

Verschuuren, Jeffrey McNeely, Robert Wild, Gonzalo Oviedo, 2012-06-25 This book illustrates that sacred natural sites although often under threat exist within and outside formally recognised protected areas and heritage sites Sacred sites may well be some of the last strongholds for building resilient networks of connected landscapes as well as forming important nodes for maintaining a dynamic cultural fabric in the face of global change The book therefore bridges the gap between approaches to the conservation of cultural and biological diversity It applies a multidisciplinary approach to recognizing understanding and managing sacred natural sites It provides examples of how economic benefits such as from tourism and fisheries can be compatible goals with the conservation of sacred biodiversity and thus advancing the welfare of both people and wildlife It concludes that conservation efforts are likely to be successful only if the cultural and spiritual values are taken into account together with the socio economic interests of the custodian communities and other relevant stakeholders from books google ocm hk

Comanagement in Practice Denyse J. Snelder, Eileen C. Bernardo, 2005 This book summarizes the lessons learned from previous studies and project activities in the northern Sierra Madre Mountain Region to draw conclusions on various aspects of comanagement

The DAC Journal, 2001 *Collaborative Natural Resource and Land-use Planning in the Copper Canyon Region, Chihuahua, Mexico* Ana Cordova, 1997 *The Landscape Ecology of Pastoral Herding* Peter B. Coppelillo, 2000 6th South Pacific Conference on Nature Conservation & Protected Areas: Conference papers, 2001 *A Contextual Framework for Integrated Wildlife Conservation Using Kajiado District, Kenya as an Illustration* Timothy George Lauxmann, 2003

Re-conceptualization of Wildlife Conservation Toshio Meguro, 2009 **Proceedings of the Regional Community-Based Natural Resource Management Conference**, 2003 **Nomadic Peoples**, 1999 **In Good Company** Richard Margoluis, 2000 **Last Stand** Randall Kramer, Carel van Schaik, Julie Johnson, 1997-03-06 During the past century tropical rain forests have been reduced to about half of their original area with a consequent loss of biodiversity This book takes a close look at how this has happened and what the consequences may be with an emphasis on those strategies that have proven successful in stemming the loss of plant and animal inhabitants It describes the use of protected areas such as sacred groves royal preserves and today's national parks which have long served to shield the delicate forest habitats for countless species Although programs for protecting habitats are under increasing attack this book argues that a system of protected areas must in fact be the cornerstone of all conservation strategies aimed at limiting the inevitable reduction of our planet's biodiversity Written by leading experts with years of experience the book integrates ecological economic and political perspectives on how best to manage tropical forests and their inhabitants throughout the world In addition to conservationists policy makers and ecologists the book will serve as a useful text in courses on tropical conservation

Seasonal Factors Influencing Livestock Herding Strategies in the Talek Area, Narok District, Kenya Bilal Butt, 2002 **Governing the Environment** H. W. O. Okoth-Ogendo, Godber W. Tumushabe, 1999 *Harvesting of Non-wood Forest Products*, 2001
