Fitzpatrick, 2016-10-14 This text reinvigorates the emphasis on the therapeutic relationship that is the core of nursing practice. It also relies on our strong history as therapists and introduces a need for integration of all aspects of care: a true holistic approach that characterizes the nursing perspective. The book should serve as a review for nurses who are studying for certification exams and is very useful for coursework in DNP programs as well as the masters programs in psychiatric mental health nursing. Grayce M Sills PhD RN FAAN Professor Emerita Ohio State University From the Foreword Now in its second edition, this groundbreaking text and reference continues to be the only resource for APRNs to focus on integrative interventions for individuals with mental health problems across the lifespan. The second edition is thoroughly updated to reflect current research, new classifications in DSM 5, genetic testing, and increased use of telemental health delivery. Organized around psychiatric syndromes, the text covers neurobiology, theory, and research evidence related to psychopharmacology, psychotherapy, and CAM interventions. It provides a virtual buffet of clear treatment options in the form of well-designed decision trees and accompanying explanatory narratives. The text also includes a section on such special considerations as substance misuse, medical problems, pregnancy, and forensic issues that often co-occur with psychiatric syndromes.
