Operating Systems: Concepts G. Sreehitha Reddy, K. Reddy Pradeep, 2019-11-07 The main software when using the computer is the operating system The operating system defines all the experiences when using a computer it manages the hardware and software resources of the computer system provides a way for applications to deal with the hardware without having to know all the details of the hardware and it is the software that makes all the programs work It organizes and controls the hardware on computers The operating system is the first software we see when we turn on the computer and the last software we see when the computer is turned off The operating system plays the role of the good parent making sure that each application gets the necessary resources while playing nicely with all the other applications as well as husbanding the limited capacity of the system for the greatest good of all the users and applications Even if a particular computer is unique an operating system can ensure that applications continue to run when hardware upgrades and updates occur
