Cancer: An Integrative Approach

Doru Paul,2026-01-01 This book represents the synthesis of many current cancer theories which combined offers a novel and innovative approach in the diagnosis prevention and treatment of cancer It introduces a new and different paradigm in the diagnosis prevention and treatment of cancer by taking into account the organism as a whole which is very different from the current cellular tissular approach toward cancer In this new paradigm cancer involves dynamic

interactions with the entire body and its internal milieu. Focusing on these interactions will permit pre-clinical cancer diagnosis and novel treatment approaches. This onco-holobiont model integrates most of the current malignant process models and it is intended for the use of practitioners, clinicians, cancer researchers and students with a particular interest in cancer. The goal of this book is to inspire scientists to go beyond the current methods in the treatment of cancer and discover new paradigms.
