Inspections and Reports on Dwellings Philip Santo, 2016-01-29 *Inspections and Reports on Dwellings* is a three volume series that comprehensively explores the process of independent professional home assessment required for the purchase of residential property. This fully updated second edition of *Inspecting* retains a focus on the needs of the surveyor to recognise and interpret the significance of observations on site whilst updating the market context within which surveyors and valuers are operating. *Inspecting* includes a consideration of the important benchmarking by the Royal Institution of Chartered Surveyors RICS of three distinct survey service levels for independent surveyors and a review of the wider choice of survey options professional surveyors can now offer to potential clients in addition to the RICS Home Survey range. There is additional content on preparing for the inspection and on reporting and there are expanded or completely new sections on a variety of subjects such as conservatories, renewable energy technologies and innovative techniques and forms of construction. With over 500 colour illustrations and an enhanced structure, the new edition reflects the very latest approach to inspecting and reporting on services, risk and legal matters. This book is essential reading for all those engaged in inspecting dwellings, whether experienced, newly qualified or studying for appropriate qualifications to become members of professional institutions.

Materials for Architects and Builders Arthur Lyons, 2014-08-21 *Materials for Architects and Builders* provides a clear and concise introduction to the broad range of materials used within the construction industry and covers the essential details of their manufacture, key physical properties, specification and uses. Understanding the basics of materials is a crucial part of undergraduate and diploma construction or architecture related courses and this established textbook helps the reader to do just that, with the help of colour photographs and clear diagrams throughout. This new edition has been completely revised and updated to include the latest developments in materials research, new images, appropriate technologies and relevant legislation. The ecological effects of building construction and lifetime use remain an important focus and this new edition includes a wide range of energy saving building components.
