Human Development and the Data Revolution Sanna Ojanperä, Eduardo López, Mark Graham, 2025-03-07 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations. Human Development and the Data Revolution explores the uses of large scale data in the contexts of development in particular what techniques data sources and possibilities exist for harnessing large datasets and new online data to address persistent concerns regarding human development inequality exclusion and participation. Employing a global perspective to explore the latest advances at the intersection of big data analysis and human development this volume brings together pioneering voices from academia development practice civil society organizations government and the private sector. With a two pronged focus on theoretical and practical research on big data and computational approaches in human development the volume covers such themes as data acquisition data management data mining and statistical analysis network science visual analytics and geographic information systems and discusses them in terms of practical applications in development projects and initiatives. Ethical considerations surrounding these topics are visited throughout highlighting the tradeoffs between benefitting and harming those who are the subjects of these new approaches. The authors explore the potentials of big data analysis for development but also the challenges and limitations for its usefulness in contexts of development illuminating how the measurement and analytical choices made in using big data analysis are far from being neutral or value free considerations.

Urban Infrastructure and Economic Development in China Chunyang Pan, 2024-01-12 This book provides an overview of the history basic concepts and provision models of infrastructure significant theories on infrastructure economics practices at home and abroad that reflect the economic development effects of infrastructure and four infrastructure economic growth models. Great attention is placed on the domestic front. This book describes and discusses in detail the historical background development trends achievements and challenges of China's infrastructure from 1949 to 2019 under the classic supply and demand analysis framework. From the four perspectives of market integration open development people's livelihood and endogenous growth this book carries out an empirical study on how to quantify and make causal inferences about the economic development effects of infrastructure. Based on the conclusion that national governance is of important help to infrastructure provision this book interprets China's governance system and its impact on infrastructure provision from the angle of decentralization and offers suggestions on policy optimizing.
