**A New Approach to Reading Videogames as Story** Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames: toy games, storybook games, and ludonarratives. This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative. This book explores the idea of storyplaying in connection with new ideas on interactive movement game mechanics and sacred play to develop a typology of videogames that will enable critics, educators, and theorists to situate videogames within a broad continuum of literary history. Building on this foundation, this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism, the emerging art world of game-mediated photography, the various economies constructed around videogames, the potential of games to serve as third places, and some suggestions for videogames in the classroom. These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation, which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises.

**Finance 101 for Kids** Walter Andal, 2021-10-13 Book 1 of 2 Series How do we equip the next generation with money management skills that they can carry forth into their adult lives? One of the most important lessons that you can teach your kids is how to handle their money. Unfortunately, for most parents, giving their kids a sound financial education is an afterthought at best. Frustrated by the lack of resources that apply the concept of finance to real-life situations for his own children to learn from, author Walter Andal was inspired to create an informative and entertaining book to help children get on the right path to making smart personal financial decisions. In *Finance 101 for Kids*, children and parents will explore how money started, how to earn and make money, saving and investing, what credit is, and the dangers of mishandling credit. What the stock market is, economic forces that can affect personal finance, what currencies and foreign exchanges are, the importance of giving back to the community, and much much more. **Research Handbook on the Metaverse and Law** Larry A. DiMatteo, Michel Cannarsa, 2024-08-06 This Research Handbook analyses the role of law in a universe fractured by new disruptive technologies such as metaverse platforms. Contributing authors explore how the law will adapt as new dimensions of the metaverse are introduced to issues such as intellectual property rights, e-commerce, NFTs, and cryptocurrencies, data privacy, contract law, as well as human rights, consumer law, and criminal law. The abuse and manipulation of users is studied in several contributions.
