Roblox Trending Comparison Near Me:

Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture [Music Streaming Around the World](#) David Hesmondhalgh, 2025 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more Music streaming platforms such as Spotify Apple Music YouTube and those offered by Chinese web giant Tencent are now central to everyday musical activity across much of the world with enormous ramifications for musical culture in modern societies Bringing together case studies from twelve countries Music Streaming around the World provides the first international account of how streaming is shaping music culture today by considering the implications of streaming platforms for the production distribution and consumption of recorded music around the globe **Value Realization in the Phygital Reality Market** Lin Huang, Biao Gao, Mengjia Gao, 2023-08-09 This book is a timely and much needed comprehensive compilation that reflects the development of research on consumption and communication in the conflation of the real and digital worlds bringing together the current state of thinking about the phygital reality market and the cutting edge challenges that are involved In this book the term phygital reality market is used implying that the physical digital and virtual realms are fused into one to recognize and understand the

market with multiple or mixed realities The concept of the phygital reality market captures the new realities that consumers are shopping consuming and living and companies are competing within the physical digital and virtual marketplaces The book covers the research on consumption service and communication in the phygital reality market and compiles the current state of thinking challenges and cases having to do with the acceptance and diffusion of new technologies of phygital reality The interest in the phygital reality market such as omnichannel retailing integrating physical stores and online services has grown hugely over the last two decades particularly since the coronavirus pandemic COVID triggered severe social and economic disruption around the world but has accelerated the acceptance and diffusion of new technologies in the phygital reality market where the physical digital and virtual worlds are conflated Versatile problem solving and new challenges are reflected in the value realization process of innovation in other words widespread acceptance and diffusion of devices or services that embody new technologies The excitement and hype associated with the metaverse have highlighted the need to understand the creation and adoption of new technologies in consumption and marketing recognition of the foundational role of new technologies in driving consumer behavior and marketing theory and practice in value realization as a vital part of the process of digital transformation

AI-Mediated Language Education in the Metaverse Era Yu-Ju Lan, Grace Yue Qi, Dorothy Chun, 2025-10-13 This book provides open discussions and dialogues around the latest research and development on applying AI and ubiquitous technologies into various language learning contexts Living in the Metaverse era arguably a turning point in the evolution of the Internet it is vital for researchers and practitioners to rethink and reconsider human and AI relationships in transforming the way we teach learn and live in everyday life Reinders et al 2022 amongst Computer Assisted Language Learning CALL researchers have emphasised the need to conduct more research on language learning in the classroom and beyond that makes real connections with what language learners do for their learning today More importantly language educators must find ways to support language learning in this new era What is urgently needed is a consolidation and synthesis of theoretical foundations visions and the latest research findings and practices on the integration of AI and ubiquitous technologies and language education from diverse perspectives This book comprising of contributions regarding contextualised AI mediated language learning and teaching provides researchers practitioners and teacher educators with an opportunity to closely engage in research informed practices and intellectual dialogues on potential opportunities and challenges in the Metaverse era It also helps to facilitate the development of equitable sustainable and just practices for the diversity of language learners today

Public Discourse and the Fashion Industry Natalia Berger, 2026-02-24 This book explores what happens when fashion discourse migrates from specialised media to mainstream newspapers Analysis of 2 263 texts across five Dutch and international case studies animal welfare disability repair practices smart wearables and metaverse fashion demonstrates systematic reversal instead of creating desire it provokes aversion instead of fostering inclusion it reinforces marginalisation instead of encouraging creativity it stokes

speculative investment appetites Drawing on Barthes s semiology of fashion Foucault s discourse theory and Lotman s concept of the semiosphere the book introduces critical discursive matrix analysis as a method for examining fashion at its periphery The findings reveal that when fashion intersects with social issues in mainstream media it becomes colonised by other discursive systems medical civic technology and financial while fashion industry voices retreat replaced by NGOs activists and technology companies pursuing non fashion agendas The volume provides insights into why sustainability efforts fail despite awareness how media representation shapes consumer behaviour and why fashion discourse cannot evolve within its commercial framework Public Discourse and the Fashion Industry will engage a diverse audience including fashion studies scholars discourse analysts media researchers sustainability practitioners policymakers fashion industry strategists and communication specialists
