Justice, Equality and Tax Law Nevja Čičin-Šain, Mario Riedl, 2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled Justice Equality and Tax Law contains not only a selection of the best master's theses of the full time LL M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic

Tax Policy Measures in Advanced and Emerging Economies: A Novel Database Mr. David Amaglobeli, Mr. Valerio Crispolti, Ms. Era Dabla-Norris, Pooja Karnane, Florian Misch, 2018-05-11 This paper describes a new comprehensive database of tax policy measures in 23 advanced and emerging market economies over the last four decades We extract this information from more than 900 OECD Economic Surveys and 37 000 tax related news from the International Bureau of Fiscal Documentation using text mining techniques The innovation of this dataset lies in its granularity changes in the rates and bases of personal and corporate income taxes value added and sale taxes social security contributions excise and property taxes are systematically documented In addition the database provides information on the announcement and implementation dates whether the measures represent major changes are part of a broader tax package and phased in over several years The paper also presents a range of stylized facts suggesting that information from this database is useful to deepen the analysis of tax policy changes for research and policy purposes

Inequality Anthony B. Atkinson, 2015-05-11

Inequality and poverty have returned with a vengeance in recent decades To reduce them we need fresh ideas that move beyond taxes on the wealthy Anthony B Atkinson offers ambitious new policies in technology employment social security sharing of capital and taxation and he defends them against the common arguments and excuses for inaction **Tax Policy Options for a United Germany** International Monetary Fund,1990-10-01 A central requirement in the rapid movement of German Democratic Republic GDR toward a market economy is the introduction of a market oriented tax system The paper highlights the main features of the traditional socialist tax structure of the GDR and the current tax structure of the Federal Republic of Germany FRG Arguments for an adequate short term tax reform in the GDR are developed in two scenarios contrasting the approach of taking over the FRG tax system adoption scenario and an autonomous tax reform in the GDR reform scenario Both scenarios recommend a flexible adjustment approach which anticipates the medium term development of the German tax system pursuant to domestic reform requirements international tax harmonization and fiscal federalism

J. Kutten,2002 **The Effect of Marginal Tax Rates on Income** Emmanuel Saez,1999 This paper uses a panel of individual tax returns and the bracket creep as source of tax rate variation to construct instrumental variables estimates of the sensitivity of income to changes in tax rates From 1979 to 1981 the US income tax schedule was fixed in nominal terms while inflation was high around 10% This produced a real change in tax rate schedules Taxpayers near the top end of a tax bracket were more likely to creep to a higher bracket and thus experience a rise in marginal rates the following year than the other taxpayers Compensated elasticities can be estimated by comparing the differences in changes in income between taxpayers close to the top end of a tax bracket to the other taxpayers These estimates based on comparisons between very similar groups are robust to underlying changes in the income distribution such as a rise in inequality The elasticities found are higher than those derived in labor supply studies but smaller than those found previously with the same kind of tax returns data Quicken 2003 Maria Langer,2002 Demonstrates upgraded features and explains how to use the finance program to track funds manage investments pay bills balance accounts collect tax information and bank online **Wines & Vines** H.
