Prasad, 2021-09-28 A cutting edge look at how accelerating financial change from the end of cash to the rise of cryptocurrencies will transform economies for better and worse We think we ve seen financial innovation We bank from laptops and buy coffee with the wave of a phone But these are minor miracles compared with the dizzying experiments now underway around the globe as businesses and governments alike embrace the possibilities of new financial technologies As Eswar Prasad explains the world of finance is at the threshold of major disruption that will affect corporations bankers states and indeed all of us The transformation of money will fundamentally rewrite how ordinary people live Above all Prasad foresees the end of physical cash The driving force won t be phones or credit cards but rather central banks spurred by the emergence of cryptocurrencies to develop their own more stable digital currencies Meanwhile cryptocurrencies themselves will evolve unpredictably as global corporations like Facebook and Amazon join the game The changes will be accompanied by snowballing innovations that are reshaping finance and have already begun to revolutionize how we invest trade insure and manage risk Prasad shows how these and other changes will redefine the very concept of money unbundling its traditional functions as a unit of account medium of exchange and store of value The promise lies in greater efficiency and flexibility increased sensitivity to the needs of diverse consumers and improved market access for the unbanked The risk is instability lack of accountability and erosion of privacy A lucid visionary work *The Future of Money* shows how to maximize the best and guard against the worst of what is to come     *AI Business for Everyone* Michael T.
