

Ian Levine

★★★★★ The Best Collection Sets in The World.

Reviewed in the United Kingdom on 22 November 2022

Money may be tight for everyone but only by genuinely supporting DOCTOR WHO - THE COLLECTION will we eventually get the full set of the entire series. If you're a genuine Doctor Who fan, I beg of you not to dawdle, but to always support the range. You don't realise how lucky you have it, compared to when I started. In 1977, the first ever Doctor Who sale of old episodes, Frontier in Space cost me THREE THOUSAND POUNDS to buy a video copy from the BBC - That's the gospel truth.

Give praise where praise is due, DOCTOR WHO THE COLLECTION - It is the ultimate way to enjoy the series. Each box is one full season, with such priceless astonishing extras, and deleted scenes. Russell Minton has done a staggering job with these. I pray to get them all during my lifetime. As fans we are so blessed to have something so utterly wonderful to enjoy time and time again. We have eleven so far out of 26 seasons and hopefully a Wilderness Years box set. The much awaited twelfth box, season two, comes next month. Pre-order it on Amazon to make sure that you get one. I appeal to EVERY fan of the series to support these. It would be a tragedy if all 26 seasons don't get made. I only wish that the current series made something so all inclusive to cherish for posterity, especially with all of the deleted scenes included.

On box set 22, there is a complete Vengeance On Vorns, which includes all of the time coded deleted scenes which I myself saved. They removed the time code in a clever and ingenious way which made the whole story incredibly watchable, even with the drops in picture quality. BRAVO - simply priceless and incredible.

For now I wish they came more often, or at least four a year. I pray that they earn enough money to contribute towards further animations.

For these incredible collections, I gladly give the BBC my all time eternal gratitude.

FOR EVERY FAN, EVERYWHERE

Silverman,Scott Stern,2017-09-29 Despite recent advances in our understanding of how innovation and entrepreneurship impact the creation and appropriation of value numerous questions remain unanswered This volume draws together scholars working at the forefront of entrepreneurship strategy and innovation related domains to explore these questions

A

*Comprehensive Approach on Sentiment Analysis & Prediction*

Manu Banga,2023-01-23 Document in the subject Computer Sciences Artificial Intelligence language English abstract In today scenario there is abrupt usage of microblogging sites such

as Twitter for sharing of feelings and emotions towards any current hot topic any product services or any event Such opinionated data needs to be leveraged effectively to get valuable insight from that data This research work focused on designing a comprehensive feature based Twitter Sentiment Analysis TSA framework using the supervised machine learning approach with integrated sophisticated negation handling approach and knowledge based Tweet Normalization System TNS We generated three real time twitter datasets using search operators such as Demonetization Lockdown and 9pm9minutes and also used one publically available benchmark dataset SemEval 2013 to assess the viability of our comprehensive feature based twitter sentiment analysis system on tweets We leveraged varieties of features such as lexicon based features pos based morphological ngrams negation and cluster based features to ascertain which classifier works well with which feature group We employed three state of the art classifiers including Support Vector Machine SVM Decision Tree Classifier DTC and Naive Bayesian NB for our twitter sentiment analysis framework We observed SVM to be the best performing classifier across all the twitter datasets except 9pm9minutes DTC turned out to be the best for this dataset Moreover our SVM model trained on the SemEval 2013 training dataset outperformed the winning team NRC Canada of SemEval 2013 task 2 in terms of macro averaged F1 score averaged on positive and negative classes only Though state of the art twitter sentiment analysis systems reported significant performance it is still challenging to deal with some critical aspects such as negation and tweet normalization
