William Olaf Stapledon (1886-1950) is one of the great figures in the history of British science fiction. The philosophical depth and imaginative breadth of his novels signified an important stage in the development of the genre, inspiring and influencing many subsequent writers. As a lecturer for the Workers Educational Association and The University of Liverpool, Stapledon began publishing academic essays in 1908 and took a doctorate in Philosophy in 1925. He was a relative late comer to fiction but eventually found in this expansive form a means of exploring his complex ideas of community and spirit. *Last and First Men* covers In 1930 he published his first novel *Last and First Men*, followed by *Odd John* (1935), *Star Maker* (1937), and *Sirius* (1944). Although Stapledon wrote other works of fiction, these are the novels that made the greatest impact during his lifetime and which continue to receive widespread critical acclaim. That is not space opera science fiction but a brilliant treatise in fictional form on scientific and ethical possibilities, a work out-pacing in imagination and credibility anything but the best of Wells and Verne.
