Intermittent fasting is a new lifestyle designed to ensure that you get the most out of every meal you eat. The idea is that you don't need to change what you are eating. You just need to change how often you are eating it and better understand how to prepare healthier meals. By working with your body's natural rhythms you can start seeing real weight loss and muscle gain in as little as one month. Inside you will find several types of intermittent fasting techniques. There is bound to be at least one that's right for you. Everything you must know to start intermittent fasting immediately and how to get the most out of it. Ways to ensure you start intermittent fasting correctly and are able to stick with it long term. More than 60 recipes to get you on the right path to a healthier diet. If you are not convinced here are some examples of the treats you might miss: Cream Cheese Pancakes, Quiche Cups, Baked Zucchini Noodles, Feta Roasted Celery Macadamia Cheese, Pan Glazed Chicken and Basil Chocolate Dipped Apricots. Do any of those treats sound like food you'd eat on a diet? We don't think so, but see for yourself. There is no need to wait. Add this book to your personal library and get started on the path toward a healthier outlook on life today.

*Eat Fat, Get Fit* Kusha Karvandi, 2017-04-30. Discover the healthy power of fullness and flavor in the important nutrient known as fat in a guide to customizing your diet by the founder of Exerscribe. When you're trying to lose weight it's reasonable to want to lose body fat in specific areas. You want flat abs, a tighter tummy, leaner legs or less flabby arms. But often you're told it just isn't possible. Nonsense. Kusha Karvandi has seen his clients get the results they want faster than ever with a customized approach helping them become their own diet detective to find which foods work best for their body. Now he shares his discoveries so you can have the body and confidence you desire. The problem with the health and fitness industry is that it makes people think they're just weak and that the best way to achieve the body they want is to suck it up and push harder. Reality shows exhaust participants with hours of daily exercise and extremely low calorie diets, but if more is better, why do the majority rebound and gain the weight back again and again? The truth is you're stronger than you think. It isn't that you somehow lack willpower or discipline; it's that you just don't have the right heuristics yet. Which one of Karvandi's mentors defined as the ability to make a decision based on limited amounts of information. The beauty of a heuristic is that it doesn't drain your willpower like calorie counting or fad diets may. In this book he shows how to craft your own diet heuristic so you can make good eating decisions no matter where you are or how much willpower you have. Though everyone has their own individual natural set point when it comes to weight, our bodies were not programmed for obesity. But when we began eating unnatural processed foods, vegetable oils and refined carbohydrates, for example, we shifted our bodies toward fat storage rather than fat burn. By avoiding foods that force your body to store fat, you can lose weight quickly and easily and create unstoppable momentum in your quest for fitness success.
