A Brief History of Stigma Ashley L. Peterson, 2021-11-08 Stigma can have a huge impact on the lives of people living with mental illness That needs to change but how can we make it happen A Brief History of Stigma explores the past and present of stigma to give a solid basis to examine strategies to reduce stigma and critically evaluate their effectiveness It also incorporates the author's experiences as a former mental health nurse living with a chronic mental illness The book is divided into three parts Part I explores what exactly stigma is including relevant sociological theory and common stereotypes Part II looks at some of the contexts in which stigma can occur including the media and health care Part III explores different stigma reduction strategies and what the research has to say about their effectiveness You'll likely be surprised to learn how ineffective certain commonly used strategies are when it comes to changing public attitudes This book is for anyone who's interested in understanding stigma and making the world a better place for people with mental illness Together we can create positive change

Not Born Yesterday Hugo Mercier, 2020-01-28 Why people are not as gullible as we think Not Born Yesterday explains how we decide who we can trust and what we should believe and argues that we're pretty good at making these decisions In this lively and provocative book Hugo Mercier demonstrates how virtually all attempts at mass persuasion whether by religious leaders politicians or advertisers fail miserably Drawing on recent findings from political science and other fields ranging from

history to anthropology Mercier shows that the narrative of widespread gullibility in which a credulous public is easily misled by demagogues and charlatans is simply wrong Why is mass persuasion so difficult Mercier uses the latest findings from experimental psychology to show how each of us is endowed with sophisticated cognitive mechanisms of open vigilance Computing a variety of cues these mechanisms enable us to be on guard against harmful beliefs while being open enough to change our minds when presented with the right evidence Even failures when we accept false confessions spread wild rumors or fall for quack medicine are better explained as bugs in otherwise well functioning cognitive mechanisms than as symptoms of general gullibility Not Born Yesterday shows how we filter the flow of information that surrounds us argues that we do it well and explains how we can do it better still The American Psychologist, 2008-02 Includes proceedings of the 54th 55th annual meetings of the association 1946 47 and proceedings of meetings of various regional psychological associations

Science John Michels (Journalist), 2008 A weekly record of scientific progress *The Critical Assessment of Research* Alan Bailin, Ann Grafstein, 2010-02-12

It is widely accepted among researchers and educators that the peer review process, the reputation of the publisher and examination of the authors' credentials are the gold standards for assessing the quality of research and information. However, in the contemporary research environment, the traditional gold standards are no longer sufficient and the effective evaluation of information requires the consideration of additional factors including who has sponsored the research, who controls the dissemination of the research, what are the effects of dominant research paradigms and what are the financial interests of authors, publishers and editors. The role of new technologies including Web 2.0 is also addressed. Relevant examples such as controversies about positive evaluations of new medications that appear in peer reviewed journals, the literature on Enron prior to the revelations that led to its collapse and the suppression of research that does not conform to dominant paradigms offered to indicate the need for a more sophisticated and nuanced approach to evaluating information. Practical suggestions for the evaluation of information are an integral part of the text.
