Macroeconomics without the Errors of Keynes James C. W. Ahiakpor,2019-06-04 Modern macroeconomics is in a stalemate with seven schools of thought attempting to explain the workings of a monetary economy and to derive policies that promote economic growth with price level stability This book pinpoints as the source of this confusion errors made by Keynes in his reading of classical macroeconomics in particular the classical Quantity Theory and the meaning of saving It argues that if these misunderstandings are resolved it will lead to economic policies consistent with promoting the employment and economic growth that Keynes was seeking The book will be crucial reading for all scholars with an interest in the foundations of Keynes's theories and anyone seeking to understand current debates regarding macroeconomic policy making

Foreign Aid and Emerging Powers Iain Watson,2014-07-11 Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical geoeconomic and geocultural tensions that influence policies of Official Development Assistance ODA This book advocates a regional geopolitical approach to explaining donor donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals MDGs Moving away from established debates assessing the advantages and disadvantages of foreign aid this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south south solidarity shared development experience and multipolarity It analyses how donor governments

sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness aid for trade public private partnerships and green growth aid The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development uniquely approaching the debate from the perspective of emerging powers and donors Catalog of Copyright Entries, Third Series Library of Congress.
