

Zoo Field Trip

The third-grade class at Thomas Elementary School goes on a trip to the zoo. Students are in groups of 5. Mr. Bell's and Ms. Bailey's classes are combined.

4. **Make Sense and Persevere** The teachers want to know how many groups will be in the combined classes. What do you need to know to solve?

5. **Use Reasoning** Find the number of groups in the combined classes. Write an equation for each step. Explain how the quantities are related.

6. **Critique Reasoning** Ryan solved the problem above. He says there are 8 groups of 5 students and 1 group of 5 students. What did Ryan do wrong?

7. **Generalize** If you wanted to find the number of groups of 5 students if Mr. Bell's and Ms. Bailey's classes were combined, could you use the same strategy you used in 5? Explain.

Classroom Teacher	Number of Students
Mr. Bell	18
Ms. Bailey	24
Ms. Hale	17

Elementary Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors
