that encourage true conceptual understanding. The early and often approach to functions helps students prepare for future math courses. A Study Skill Strategy is introduced in each chapter opener and then expanded upon throughout the chapter in the Building Your Study Strategy boxes that appear before each exercise set. Students can further develop their study skills with the Study Skills Workbook written by Alan Bass to accompany the Woodbury texts. Vocabulary Exercises begin each section of exercises and check student understanding of the basic vocabulary presented in the preceding section.

**Basic College Mathematics** John Tobey, Jeffrey Slater, 2004-10. This clear, accessible treatment of mathematics features a building block approach toward problem solving, realistic and diverse applications, and chapter organizer to help users focus their study and become effective and confident problem solvers. The Putting Your Skills to Work and new chapter end feature Math in the Media present readers with opportunities to utilize critical thinking skills to analyze and interpret data and problem solve using applied situations encountered in daily life. Chapter 7 Geometry has been extensively revised and reorganized to include a new section 7.1 on angles and new section 7.4 devoted to triangles. Increased coverage of estimating with fractions and decimals with new To Think About exercises in Sections 2.5, 2.8 and 3.3 and a new lesson in Section 3.7. Coverage of fractions in Chapter 2 has been expanded as follows: Section 2.6 now begins with a discussion of least common multiples so that the subsequent coverage of least common denominators is more complete. A new lesson on order of operations in Section 2.8 offers readers additional review of these rules and practice applying them to fractions and a new mid chapter test on fractions appears after Section 2.5. Percent applications are now covered in two sections Sections 5.4 and 5.5 to allow for a more patient presentation of this important topic.

**Economics Today** Roger LeRoy Miller, 2004. Economics Today has long led the field in offering students and instructors a dynamic, application rich approach to teaching and learning economics. The book is based on the belief that students learn more when they are involved and engaged. The 12th edition features all new examples that have been selected to grab and hold students' attention. These examples serve one basic purpose: to drive home the application of the theory just presented. One of the keys to the success of Economics Today is that it is suitable for many teaching styles. Instructors who wish to stress theory can do so. Those who wish to stress applications and examples can do that. Those who wish to incorporate technology into the class can do so with ease using MyEconLab.

**Essentials of Basic College Mathematics** John Tobey, Jeffrey Slater, 2005. A descriptive grammar of Yoruba, a major West African language spoken by over twelve million people.

**Statistics for Economics, Accounting and Business Studies** Michael Barrow, 2009-03. Barrow Cover Blurb 5e. Do you need to brush up on your statistical skills to truly excel in your economics or business course? If you want to increase your confidence in statistics then this is the perfect book for you. The 5th edition of Statistics for Economics, Accounting and Business Studies continues to present a user friendly and concise introduction to a variety of statistical tools and techniques. Throughout the text the author demonstrates how and why these techniques can be used to solve real life problems highlighting common mistakes and assuming no prior knowledge of the subject. New to this edition Chapter 11

Seasonal Adjustment of Time Series Data is back by popular demand. New worked examples in every chapter and more real life business examples such as whether the level of general corruption in a country harms investment and whether boys or girls perform better at school show how to apply an understanding of statistical techniques to wider business practice. New interactive online resource MathXL. See below for more details. MathXL A brand new online learning resource for this edition available to users of this book. [www.pearsoned.co.uk/barrow](http://www.pearsoned.co.uk/barrow) An unrivalled online study and testing resource that generates a personalised study plan and provides extensive practice questions exactly where you need them. Interactive questions with randomised values allow you to practise the same concept as many times as you need until you master it. Guided solutions break down the question for you step by step. Audio animations talk you through key statistical techniques. This core textbook is aimed at undergraduate and MBA students taking an introductory statistics course on their economics, accounting or business studies degree.

About the Author Michael Barrow is a Senior Lecturer in Economics at the University of Sussex. He has acted as a consultant for major industrial, commercial and government bodies.

Quotes An excellent reference book for the undergraduate student, filled with examples and applications both practical (i.e. computer based) and traditional (i.e. pen and paper) problems, wide ranging and sensibly ordered. The book is clearly written, easy to follow, yet not in the least patronising. This is a particular strength.

Christopher Gerry, UCL There are thousands of intro stats books on the market but few which are sufficiently orientated towards economics and even fewer that treat topics with as much rigour as Barrow does.

Andy Dickerson, University of Sheffield I really like the text book. I think it provides a very clear and coherent introduction to Statistics and I have used the various editions as the core text for my course for at least 6 years. One of its key strengths is the number of real world examples using real economic data along with worked problems showing students how to apply methods.

Julie Litchfield, University of Sussex The Barrow exercises and online resources offer good scope for directing students to a great source of self study.

Robert Watkins, Kingston University

**Prealgebra** Jamie Blair, John Tobey, Jeffrey Slater, 2005
