**We, the Data** Wendy H. Wong, 2023-10-10 A rallying call for extending human rights beyond our physical selves and why we need to reboot rights in our data intensive world Winner of the 2024 Balsillie Prize for Public Policy Shortlisted 2024 Lionel Gelber Prize Our data intensive world is here to stay but does that come at the cost of our humanity in terms of autonomy community dignity and equality In *We the Data* Wendy H Wong argues that we cannot allow that to happen Exploring the pervasiveness of data collection and tracking Wong reminds us that we are all stakeholders in this digital world who are currently being left out of the most pressing conversations around technology ethics and policy This book clarifies the nature of datafication and calls for an extension of human rights to recognize how data complicate what it means to safeguard and encourage human potential As we go about our lives we are co creating data through what we do We must embrace that these data are a part of who we are Wong explains even as current policies do not yet reflect the extent to which human experiences have changed This means we are more than mere subjects or sources of data by products that can be harvested and used by technology companies and governments By exploring data rights facial recognition technology our posthumous rights and our need for a right to data literacy Wong has crafted a compelling case for engaging as stakeholders to hold data collectors accountable Just as the Universal Declaration of Human Rights laid the global groundwork for human rights *We the Data* gives us a foundation upon which we claim human rights in the age of data

Sinn, Andreas Heusler, 2022-02-21 *German Jews and Migration to the United States 1933-1945* is a collection of first person accounts many previously unpublished that document the flight and exile of German Jews from Nazi Germany to the USA The authors of the letters and memoirs included in this collection share two important characteristics They all had close ties to Munich the Bavarian capital and they all emigrated to the USA though sometimes via detours and or after stays of varying lengths in other places of refuge Selected to represent a wide range of exile

experiences these testimonies are carefully edited extensively annotated and accompanied by biographical introductions to make them accessible to readers especially those who are new to the subject These autobiographical sources reveal the often traumatic experiences and consequences of forced migration displacement resettlement and new beginnings In addition this book demonstrates that migration is not only a process by which groups and individuals relocate from one place to another but also a dynamic of transmigration affected by migrant networks and the complex relationships between national policies and the agency of migrants

Andrew Guthrie Ferguson,2026-03-17 Interrogates how digital self surveillance can be turned against us by police  
prosecutors and political whims For consumers living in a digitally connected world smart technologies have built an  
inescapable trap of digital self surveillance Smart cars smart homes smart watches and smart medical devices track our most  
private activities and intimate patterns While these devices allow users to receive personal insights by monitoring their every  
move that data can be accessed by police and prosecutors looking to find incriminating clues Digital technology exposes  
everyone everywhere all at once and we have few laws to regulate it In Your Data Will Be Used Against You Andrew Guthrie  
Ferguson warns us of how the rise of sensor driven technology social media monitoring and artificial intelligence can be  
weaponized against democratic values and personal freedoms At the same time that data will solve crimes radically  
transforming how criminal cases are prosecuted Ferguson explores how this proliferation of private data in combination with  
public surveillance networks promises new ways to solve previously unsolvable crimes but also leaves us vulnerable to  
governmental overreach and abuse He argues for legal interventions that address the threat of digital self surveillance and  
provides concrete suggestions about how legislators judges and communities should respond As consumers citizens and  
potential subjects of surveillance the questions in this book must be confronted now before the trap of surveillance captures  
us completely Providing a stark warning of the dangers of digital self surveillance Your Data Will be Used Against You is a

based grade specific material to all their students at the same time whether Jake was reading at a first grade level or Taylor

at a ninth grade level It was a rare and lucky child who fit the profile of the year's onslaught of tests Since No Child Left Behind US schools have been burying students in tests and then drawing often misguided conclusions when sometimes the only conclusion anyone ought to draw is that student X obviously spent hours staring at a set of questions he or she did not understand and maybe could not even read We have been told that US education is in crisis Ms Turner agrees In Fighting the White Knight she argues that government mandates created and are now perpetuating this crisis depriving children of remedial learning instruction time and personal attention Fighting the White Knight also looks at the 1.6 trillion student debt crisis a consequence of today's single minded college bound pipeline vocabulary deficits left to fester due to narrowly targeted curricula and the sneaky gutting of elective vocational technical and gifted education Ms Turner concludes by advocating for changes she believes can rescue American education guiding children back to the safe inspirational learning experiences of a more student focused time      **Saveur** ,2001
