Network Analysis in Archaeology Carl Knappett, 2013-04-25 While the study of networks has grown exponentially in the past decade and is now having an impact on how archaeologists study ancient societies its emergence in the field has been dislocated This volume provides a coherent framework on network analysis in current archaeological practice by pulling together its main themes and approaches to show how it is changing the way archaeologists face the key questions of regional interaction Working with the term network as a collection of nodes and links as used in network science and social network analysis it juxtaposes a range of case studies and investigates the positives and negatives of network analysis With contributions by leading experts in the field the volume covers a broad range from Japan to America from the Palaeolithic to the Precolumbian *New Approaches to Ancient Material Culture in the Greek & Roman World* Catherine

Cooper, 2020-11-16 *New Approaches to Ancient Material Culture in the Greek Roman World* is about Classical Archaeology at its broadest and is important reading to all Classicists As part of a recent movement to highlight the rich diversity of the subject it overcomes traditional disciplinary boundaries to show the variety of current approaches to the study of Classical Antiquity from the Late Bronze Age to the Late Antique period The multi disciplinary papers deal with archaeology and art history museum objects and fieldwork data ancient texts and material culture archaeological theory and historiography and technical and literary analysis The international contributors discuss a selection of methodologies currently used to study ancient material and illustrate their relevance through case studies which span the Greek and Roman world The Oxford Handbook of Archaeological Network Research Tom Brughmans, Barbara J. Mills, Jessica Munson, Matthew A. Peeples, 2024 This Handbook is the first authoritative reference work for archaeological network research featuring current topical trends and covering the archaeological application of network methods and theories **Network Science in Archaeology** Tom

Brughmans, Matthew A. Peeples, 2023-04-13 The Cambridge Manual to Archaeological Network Science provides the first comprehensive guide to a field of research that has firmly established itself within archaeological practice in recent years Network science methods are commonly used to explore big archaeological datasets and are essential for the formal study of past relational phenomena social networks transport systems communication and exchange The volume offers a step by step description of network science methods and explores its theoretical foundations and applications in archaeological research which are elaborately illustrated with archaeological examples It also covers a vast range of network science techniques that can enhance archaeological research including network data collection and management exploratory network analysis sampling issues and sensitivity analysis spatial networks and network visualisation An essential reference handbook for both beginning and experienced archaeological network researchers the volume includes boxes with definitions boxed examples exercises and online supplementary learning and teaching materials **Transfer of Buddhism Across Central Asian**

**Networks (7th to 13th Centuries)** , 2015-10-05 The interdisciplinary volume *Transfer of Buddhism across Central Asian*

Networks 7th to 13th Centuries edited by Carmen Meinert offers a new transregional and transcultural vision for religious transfer processes in Central Asian history. It looks at the region as an integrated religious whole rather than from the perspective of fragmented sub disciplines and analyses the spread of Buddhism as a driving force in a societal and cultural change of pan Asian importance. One particular dimension of this Buddhist globalisation was the rise of local forms of Buddhism. This volume explores Buddhist localisations through manuscripts and material culture in the multiethnic oases of the Tarim basin, the Transhimalayan region of Zangskar, Ladakh and Kashmir and the Western Tibetan Kingdom of Purang Guge. Contributors are Kazuo Kano, Deborah Klimburg Salter, Rob Linrothe, Linda Lojda, Carmen Meinert, Henrik H. S. Rensen, Monica Strinu, Gertraud Taenzer, Sam van Schaik and Jens Wilkens. *The Oasis of Bukhara, Volume 2: An Archaeological, Sociological and Historical Study* Rocco Rante, Florian Schwarz, Luigi Tronca, 2022-04-04. In *An Archaeological, Sociological and Historical Study* volume 2 of *The Oasis of Bukhara*. Rocco Rante, Florian Schwarz and Luigi Tronca engage in a strong pluridisciplinary collaboration and use an innovative approach to offer a new contribution to the history of the oasis of Bukhara from the end of the last millennium BCE to the end of the medieval era. Referencing archaeological, historical and sociological data, the book revisits the history of this Central Asian region, giving the specialist and general reader a detailed description of the political and socio-economical features that characterized the oasis during this long chronological span. The volume is co-published by Brill Leiden and the Louvre Museum Paris.

**Mobility and Pottery Production** Caroline Heitz, Regine Stapfer, 2017. This book combines findings from archaeology and anthropology on the making, use and distribution of hand-made pottery, the rhythms of mobility involved and the transformations triggered by such processes, discussing different theoretical perspectives and methodological approaches. **Bulletin**, 2021. *Inequality, Wealth, and Market Exchange in the Maya Lowlands* Els Barnard, 2021. This volume examines the economic system of the Classic Maya Lowlands center of Uxul Campeche, a secondary center under the political influence of Calakmul. A household-based approach is used to review the urban economic system in which these households played a central role. Multiple lines of evidence are combined here, using both quantitative and qualitative methods to study economic inequality, settlement organization, social integration, power structures, consumption, production and exchange at the site. The results suggest that the economy of Uxul was largely based on market exchange and although wealth inequality was high, people along the socio-economic spectrum had significant economic agency, comparable quality of life and economic mobility was possible. This study shows that the implementation of a multifaceted household-based approach allows for a more complete understanding of the complex economy of an ancient urban center. **Gallia préhistoire**, 2021.
