

The background of the book cover is a dark blue color. Overlaid on it are several stylized, glowing blue flower-like shapes. These shapes have multiple thin, light blue stems branching out from a central point, with small, rounded, translucent blue petals or leaves at the ends. The flowers are scattered across the page, with some in the foreground and others in the background.

Inhuman Networks

Grant Bollmer, 2016-08-11 Social media s connectivity is often thought to be a manifestation of human nature buried until now revealed only through the diverse technologies of the participatory internet Rather than embrace this view Inhuman Networks Social Media and the

Archaeology of Connection argues that the human nature revealed by social media imagines network technology and data as models for behavior online. Covering a wide range of historical and interdisciplinary subjects, Grant Bollmer examines the emergence of the network as a model for relation in the 1700s and 1800s and follows it through marginal often forgotten articulations of technology biology economics and the social. From this history Bollmer examines contemporary controversies surrounding social media extending out to the influence of network models on issues of critical theory politics popular science and neoliberalism. By moving through the past and present of network media, Inhuman Networks demonstrates how contemporary network culture unintentionally repeats debates over the limits of Western modernity to provide an idealized future where the human is interchangeable with abstract flowing data connected through well managed distributed networks.

Digital Religion, Social Media, and Culture Pauline Hope Cheong, 2012 This anthology is the first of its kind in eight years and collects some of the best and most current research and reflection on the complex interactions between religion and computer mediated communication (CMC). The contributions cohere around the central question: how will core religious understandings of identity community and authority shape and be re shaped by the communicative possibilities of Web 2.0? The authors gathered here address these questions in three distinct ways through contemporary empirical research on how diverse traditions across the globe seek to take up the technologies and affordances of contemporary CMC through investigations that place these contemporary developments in larger historical and theological contexts and through careful reflection on the theoretical dimensions of research on religion and CMC. In their introductory and concluding essays the editors uncover and articulate the larger intersections and patterns suggested by individual chapters including trajectories for future research.

Social Media in the Arab World Barrie Gunter, Mokhtar Elareshi, Khalid Al-Jaber, 2016-04-21 Following the Arab Spring the use of social media has become instrumental in organising activist movements and spreading political dissent in the Middle East. New online behaviours have transformed traditional communication channels enabling young people of all backgrounds to feel politically empowered. But now that spring has turned to winter what are the long term implications of internet activism in the region? Social Media in the Arab World provides a unique insight into the role of online communications as a force for change in the Gulf States. Featuring examples as diverse as neo patrimonial politics in Saudi Arabia and the ways an online presence affects the status of women in Kuwait the chapters examine shifts in the political social and religious identities of citizens as a result of increased digital activism. With contributions from a variety of interdisciplinary experts this wide ranging study examines the consequences of changing power dynamics brought about by popular social media. In doing so this book offers an original perspective on the long term implications of internet usage in the Arab world and is essential reading for students and researchers working across the region.

Still Connected Claude S. Fischer, 2011 The book shows that Americans today have fewer relatives than they did forty years ago and that formal gatherings have declined over the decades at least partially as a result of later marriages and more women in the work force.

Yet neither the overall quantity of personal relationships nor more importantly the quality of those relationships has diminished Americans contact with relatives and friends as well as their feelings of emotional connectedness has changed relatively little since the 1970s Although Americans are marrying later and singly people feel lonely few Americans report being socially isolated and the percentage who do has not really increased The author maintains that this constancy testifies to the value Americans place on family and friends and to their willingness to adapt to changing circumstances in ways that sustain their social connections *Statement* ,2012 **California Agriculture** ,2018-10 *Proceedings of the ...*
