

#### 6) Defining Activities

Activities are the main work elements created under the suitable WBS and are arranged in sequence of executions and further linked by the relationships. Example- under the WBS Substructure the Activity will be named as Foundation which will be further classified in sub activities like excavation, PCC, Shuttering-ROC-DE shuttering etc.

#### 7) Relationships between Activities

Activities are linked together by the set of relationships to form a network of activities which will give the total project duration.

- Finish to start (FS) relationship.
- Finish to finish (FF) relationship.
- Start to start (SS) relationship.
- Start to finish (SF) relationship

#### 8) Dates & Duration

Duration for each activity are feed manually for each activity which will then when linked will give the start date and finish dates and the whole duration of the project.

#### 9) Cost

Cost of activity are assigned by allocating the resources demanded by the activity along with their quantity and unit rates.

#### 10) Baseline

Baseline is the original path of project which will be used as benchmark to track the actual progress in comparison with original path to see whether it is on schedule or delayed or early.

#### 11) Schedule and Updates

- If the project is progressing exactly as planned, then only needed to estimate progress.
- If the project is not progressing as planned many activities are starting out-of-sequence, actual resource use is exceeding planned use, and then update should be done for activities and resources individually.
- Most projects contain some activities that progress as planned and some which do not. In this case, the best method is to combine the two updating methods.

#### 12) Tracking

It is a monitoring tool for monitoring the progress of project in terms of the cost, resource allocation.
