Pozza, 2024-09-14 This book helps to bridge the knowledge gap that currently surrounds space technology and its method of exploration and highlights much needed awareness and attention to an increase in Space Law and sustainable measures The ever increasing usage of space based solutions by both public and commercial entities is producing congestion in the radio frequency spectrum as well as orbital slots The inevitable commercialization of satellite technology will certainly result in a proliferation of privately owned and managed satellite spacecraft in low Earth orbits Cyber vulnerabilities in the Air Force and the DoD frequently ignore satellite ground systems Space ground system cyber security assaults and investigations include those involving satellite control communications terminal hacking and GPS spoofing A continuous cyber security assessment technique is required for space systems to identify assess reduce and address sophisticated cyber threats Risk based compliance regular cybersecurity risk assessments and a renewed focus on the elimination of system flaws at the time of design are all necessary for space ground and control systems Due to the absence of a rigid regulatory framework satellites play a significant part in the production of space debris which is a source of increasing worry Such debris manufactured artificially contributes greatly to the destruction of the environment in Earth's orbit There is not a single framework in existence that can appropriately govern contemporary concerns like the security of

satellite data and debris in orbit The Department of Defence DoD is now responsible for monitoring all objects in space however it cannot require satellite operators to take precautions against potential collisions

Science Fraud: Darwin's Plagiarism of Patrick Matthew's Theory Mike Sutton, 2023 Patrick Matthew in 1831 originated the complete theory of evolution by natural selection in his book *On Naval Timber and Arboriculture* and did so before Charles Darwin and Alfred Wallace claimed to independently replicate it in 1858 Unjustly and against the Arago convention on priority a ruling that gives origination of any science theory to the first to publish Matthew has been illicitly denied his priority on the grounds he never influenced anyone with his breakthrough Today Big Data research has uncovered Darwin's science fraud by plagiarism revealing evidence which proves beyond all reasonable doubt that he and Alfred Wallace both independently plagiarised the theory of evolution by natural selection from Patrick Matthew Books have been newly unearthed in the publication record to show that at least 30 people cited Matthew's work in published literature before 1858 and that several were known influencers of Darwin's and Wallace's work in the field Additionally several people in Darwin's and Wallace's social circles were first to be second into print using original terms coined by Matthew in his bombshell breakthrough book This book reveals all the newly unearthed data and essentially explains it alongside the deplorable treatment of Patrick Matthew in scholarly historical context Dr Mike Sutton further reveals using social science participatory observation methods and experimental results how members of the so called Darwin Industry enabled and facilitated by the deliberate publication of falsehoods and other grossly misleading editing on Wikipedia have disgracefully worked to re bury these newly unearthed facts by means of knee jerk blind sight ignorant rejection blatant and deliberate fact denial censorship persistent and serious workplace harassment obscene social media abuse poison pen emails lies mischievous

process using the topical issue of military activities in Antarctica Along the way the authors make suggestions to augment current theory and practice of geopolitical scenario planning In doing so this book seeks to rediscover the importance of a classical primarily state centric lens on Antarctic geopolitics which in recent decades has been overshadowed by more critical perspectives This book is written for anyone with an interest in the rigorous assessment of geopolitical futures in Antarctica and beyond

King Alfred the Great, his Hagiographers and his Cult Tomás Mario Kalmar, 2025-10-01 This book situates Alfred the Great in his hagiographic context For 150 years the fables told in the ninth century about Alfred's childhood have posed interlocking disciplinary challenges to historians committed to evicting romance from history Blending current Hagiography Studies with historical literary and biblical hermeneutics can help us forgo the anti hagiographic commitments which motivated the scholars who purified the Victorian cult of Alfred by expunging his legends and salvaging his historicity The book focusses on the typological functions of three Alfredian fables from the Old English Chronicle the Old English Boethius and Asser's Vita Alfredi analyses the plot common to all three critiques the psychological conjecture that Alfred's childhood memory was their common source and shows that synoptically they can help us see how Alfred shaped the curve of his own life's destiny and how he engaged in the formation of his own cult to last a thousand years
