

PATTERN AND PROBLEM SOLVING LABORATORY KIT F

CONTENTS: 12 Task Cards
12 Black Line Masters

Kit F provides activities that involve single, double, and triple reflections of patterns and the use of tessellations.

Symmetry, reflection, color recognition, pattern recognition, pattern duplication, and tessellation skills are exercised.

In Task Cards 1-4, students first match the appropriate colors of the Unifix cubes to the colored squares in the task cards. Next, they reflect this pattern about the horizontal line. The result is that the line becomes the line of symmetry. The skill of recognizing symmetrical points about the line is emphasized.

In Task Card 5, the angle of the arrangement of Unifix cubes is changed, but otherwise it resembles the first four task cards.

In Task Card 6, the line of symmetry is vertical rather than horizontal, as was the case previously.

Task Cards 7 and 8 involve two reflections. The first reflection is about the vertical line and thus completes one-half of the total pattern. The next is about the horizontal line, completing the full pattern. These are two lines of symmetry.

Task Card 9 introduces "tiling" or tessellations. Tiling is achieved when the same pattern can be used to cover a plane surface. These task cards have boundaries, and therefore only parts of the tile are used at some places along the edge. The color pattern needs to be followed carefully. Three Unifix cubes are needed for each full tile. Therefore, these tiles are sometimes referred to as triominoes. This is the "L" triomino.

Task Card 10 uses the "T" tetraminoes; Task Card 11 uses the cross pentomino; and Task Card 12 uses the "W" pentomino.

The black line masters can be used to introduce different color patterns simply by coloring rather than using Unifix cubes, or they can be used to create original designs and then used with Unifix cubes in the same manner as the task cards. This provides broad opportunity for creative designs, limited only by the imagination of the designers.
