Computer Manual in MATLAB to accompany Pattern Classification David G. Stork, Elad Yom-Tov, 2004-04-08

Computer Manual to Accompany Pattern Classification and its associated MATLAB software is an excellent companion to Duda Pattern Classification 2nd ed DH S. The code contains all algorithms described in Duda as well as supporting algorithms for data generation and visualization. The Manual uses the same terminology as the DH S text and contains step by step worked examples including many of the examples and figures in the textbook. The Manual is accompanied by software that is available electronically. The software contains all algorithms in DH S indexed to the textbook and uses symbols and notation as close as possible to the textbook. The code is self annotating so the user can easily navigate, understand and modify the code.

Pattern Classification 2nd Edition with Computer Manual 2nd Edition Set Richard O. Duda, 2004-06-04. The first edition published in 1973 has become a classic reference in the field. Now with the second edition, readers will find information on key new topics such as neural networks and statistical pattern recognition, the theory of machine learning and the theory of invariances. Also included are worked examples, comparisons between different methods, extensive graphics, expanded exercises and computer project topics. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

Pattern Classification: WITH Computer Manual, 2nd ed, 2004. **Handbook of Pattern Recognition and Computer Vision** Chi-hau Chen, 2010. Both pattern recognition and computer vision have experienced rapid progress in the last twenty five years. This book provides the latest advances on pattern recognition and computer vision along with their many applications. It features articles written by renowned leaders in the field while topics are presented in readable form to a wide range of readers. The book is divided into five parts: basic methods in pattern recognition, basic methods in computer vision and image processing, recognition applications, life science and human identification, and systems and technology. There are eight new chapters on the latest developments in life sciences using pattern recognition as well as two new chapters on pattern recognition in remote sensing.

Computer Manual in Mathematica to accompany Pattern Classification David G. Stork, Shashidhar Sathyanarayana, 2016-10-10. Computer Manual MATHEMATICA version to accompany Pattern Classification Third Edition and its associated software contains all the MATHEMATICA code for the dynamic figures in the electronic version of PATTERN CLASSIFICATION 3rd ed. Duda, Hart and Stork as well as for core algorithms in pattern classification: clustering and feature extraction described in the text. The code is cross referenced with the material from the textbook and uses the same terminology and symbols so that the conceptual link from course material to working code is tight.
