EBOOK: Qualitative Research Design for Software Users Silvana di Gregorio, Judith Davidson, 2009-01-16 Di Gregorio the second part uses case studies to demonstrate the issues and the design framework introduced in the first part. These chapters are supported by numerous screenshots illustrating the software under discussion. The last part contains practical appendices to help readers apply the framework introduced to their own research. Di Gregorio and Davidson introduce The notion of the E Project or electronic project as a genre. A framework for representing the research design of a project in any QDAS package. Ethical considerations when working in QDAS. A variety of contextual issues including national and organizational differences. Eight real research projects of a variety of designs and using different QDAS ATLAS ti, MAXqda, NVIVO and XSight. Separate checklists for ATLAS ti, MAXqda, NVIVO and XSight providing practical help in applying the research design framework presented in the book. Uniquely the book examines issues related to both academic and non academic uses of QDAS. Qualitative Research Design for Software Users is a useful reference for upper level students, academics and researchers across a range of disciplines.

Oxford Textbook of Palliative Medicine Nathan I. Cherny, Marie Fallon, Stein Kaasa, Russell K. Portenoy, David Currow, 2015. Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care.

A Textbook of Children's and Young People's Nursing E-Book Edward Alan Glasper, James Richardson, 2010-05-19. This popular textbook is aimed at children's nurses in a wide range of practice settings including primary ambulatory and tertiary care. Covering the full age and specialty spectrum this text brings together chapters from among the best known children's nurses in the UK. It describes family centred child healthcare drawing upon practice throughout the UK and further afield. This innovative text provides up to date information on a wide range of topics. Each chapter offers readers additional material on Evolve. Full Microsoft PowerPoint presentations that facilitate interactive learning augment the written chapters and provide information not normally possible in a standard textbook e.g. colour photographs, video clips. Although intended for nurses the book adopts an interprofessional problem solving and reflective approach aimed at students, practitioners and child health educators. Material is offered from levels 1-3 and some of the ancillary material extends into the postgraduate arena. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding. Professional conversation boxes enliven the text on the page and make it more interesting to dip into. Suggestions for seminar discussion topics to help teachers. Case studies help to relate theory to practice. Prompts to promote reflective practice. Activity boxes, suggested visits, Evidence based practice boxes which highlight key research studies, annotated bibliographies including details of web sites and full contemporary references to the evidence base. Resource lists including recommended web site addresses. New chapter on

Curtis, Jonathan Drennan, 2013-09-16 This book is a detailed and comprehensive guide to undertaking quantitative health research at postgraduate and professional level. It takes you through the entire research process from designing the project to presenting the results and will help you execute high quality quantitative research that improves and informs clinical practice. Written by a team of research experts this book covers common practical problems such as applying theory to research and analysing data. It also includes chapters on communicating with ethics committees, recruiting samples from vulnerable populations, audit as a research approach, quasi experimental designs and using cognitive interviewing making it a new and innovative offering for health researchers. Other topics covered in this book include Ethical considerations of research, Designing and planning quantitative research projects, Data measurement and collection, Analyzing and presenting results. With a strong practical focus each chapter features examples of real life research to illustrate the quantitative research process as well as tips and insights into research planning and execution. This book is an essential guide for all health care professionals undertaking a postgraduate degree as well as health researchers and practitioners who need to carry out research as part of their professional role. Contributors: Ruth Belling, Michelle Butler, Catherine Comiskey, Siobhan Corrigan, Gloria Crispino, Orla Dempsey, Suzanne Guerin, Maree Johnson, Carmel Kelly, Elaine Lehane, Maria Lohan, Susan McLaren, Deirdre Mongan, Corina Naughton, Rhona O'Connell, Elaine Pierce, Gary Rolfe, Eileen Savage, Anne Scott, Emma Stokes, Roger Watson. Learning quantitative research is taken much for granted. This is probably why there are fewer generic books on quantitative than qualitative research. This book is long overdue. Clearly written and well structured it takes us through the whole journey of a research project from developing research questions to presenting the findings, passing through philosophical underpinnings, recruitment of participants and ethical considerations. Written by an array of well known researchers and teachers this book will certainly appeal to new as well as seasoned researchers. Those who will use it will not be disappointed. Kader Parahoo, University of Ulster. The title of this text is somewhat misleading. It is not only an excellent and thorough guide to qualitative health research methods it is also an excellent introduction to all forms of qualitative research. It takes the reader gently through theoretical and ethical concerns to the practicalities and benefits of utilising qualitative approaches. As such it is that rare thing a text that can be used by novice researchers to learn their craft and a key reference resource for experienced research practitioners. Dr John Cullen, School of Business, National University of Ireland, Maynooth, UK. This is a first rate collection of essays that promotes an informed understanding of both underpinning principles and widely used techniques. A great deal of effort has clearly been invested in co-ordinating the contributions and this has delivered clarity, complementarity and effective coverage. This is a welcome, carefully crafted and very accessible resource that will appeal to students and researchers in healthcare and beyond. Martin Beirne, Professor of Management and Organizational Behaviour, University of Glasgow, Adam Smith Business School, UK. *Necessary Conditions*, Gary Goertz, Harvey Starr, 2002-08-27. This anthology is devoted to the implications of necessary conditions for social science.
