Dilip S. Mutum,Soo Yeong Ewe,Ezlika M. Ghazali,Racheal Louis Vincent,2024-04-01 There is an increasing interest in emerging markets because of the higher economic growth rates compared to developed economies However these markets have a diverse consumer base with unique needs and preferences As a result companies in these markets face different challenges and opportunities Unfortunately there is a lack of marketing cases from these markets This book presents actual real world marketing cases in these markets offering an in depth look at some of the issues faced by companies in different industries It is hoped that the cases would serve as valuable reference material for academics students professionals in marketing business strategy and other related fields as well as policymakers to better understand the challenges of these markets and develop strategies to succeed in them

[Riding the Energy Transition](#)

Reda Cherif,Fuad Hasanov,Aditya Pande,2017-05-22 Recent technological developments and past technology transitions suggest that the world could be on the verge of a profound shift in transportation technology The return of the electric car and its adoption like that of the motor vehicle in place of horses in early 20th century could cut oil consumption substantially in the coming decades Our analysis suggests that oil as the main fuel for transportation could have a much shorter life span left than commonly assumed In the fast adoption scenario oil prices could converge to the level of coal prices about 15 per barrel in 2015 prices by the early 2040s In this possible future oil could become the new coal

Competitors Jan Kachelmaier,2017-07-17 Research Paper undergraduate from the year 2016 in the subject Business economics Industrial Management grade 3 7 93% California State University Fullerton language English abstract The paper analysis the automotive industry in general as well as the relative position of the Volkswagen AG Furthermore VW s competitors are assessed and recommendations for actions are formulated In the beginning the creation of the automobile seemed less of a need and more of a luxury as the cars could only be afforded by the well off The very first steam car took to the road in France in 1768 but Cugnot s novel idea did not trigger the beginning of the car industry After Henry Ford s model made its debut owning a car was a symbol of status because it could only be afforded by the wealthy Once the process of Henry Ford s mass production was introduced cars could be afforded by a wider dynamic of people and ownership became an

affordable growing trend The production of automobiles was a great help to the economy It provided jobs across industries including positions in steel and machine tool makers for the different metal parts of the car The increase in the need of supplies and other parts of the car including the battery head lights paint and interior upholstery were the driving forces for new businesses to thrive Cars being a part of the everyday norm meant they would need routine car maintenance which became a major source of business This also led to the increase of petroleum sales as the demanded use of cars increased When WWII came the US was able to use the jeep for military use additionally Chrysler reworked the jeep design to create tanks Moreover car production in Europe turned its focus from the people's car to cars designed for the military *The Dynamics of Plug-in Electric Vehicles in the Secondary Market and Their Implications for Vehicle Demand, Durability, and Emissions* Thomas Turrentine, Gil Tal, David Rapson, 2018 *Tesla's Market Entry Strategy in Germany.
