**GOOGLE STOCK PRICE: TIME-SERIES ANALYSIS, VISUALIZATION, FORECASTING, AND PREDICTION
USING MACHINE LEARNING WITH PYTHON GUI** Vivian Siahaan, Rismon Hasiholan Sianipar, 2023-06-11 Google officially known as Alphabet Inc is an American multinational technology company. It was founded in September 1998 by Larry Page and Sergey Brin while they were Ph D students at Stanford University. Initially it started as a research project to develop a search engine but it rapidly grew into one of the largest and most influential technology companies in the world. Google is primarily known for its internet related services and products with its search engine being its most well known offering. It revolutionized the way people access information by providing a fast and efficient search engine that delivers highly relevant results. Over the years Google expanded its portfolio to include a wide range of products and services including Google Maps, Google Drive, Google Gmail, Google Docs, Google Photos, Google Chrome, YouTube, and many more. In addition to its internet services, Google ventured into hardware with products like the Google Pixel smartphones, Google Home smart speakers, and Google Nest smart home devices. It also developed its own operating system called Android, which has become the most widely used mobile operating system globally. Google's success can be attributed to its ability to monetize its services through online advertising. The company introduced Google AdWords, a highly successful online advertising program that enables businesses to display ads on Google's search engine and other websites through its AdSense program. Advertising contributes significantly to Google's revenue along with other sources such as cloud services, app sales, and licensing fees. The dataset used in this project starts from 19 Aug 2004 and is updated till 11 Oct 2021. It contains 4317 rows and 7 columns.
