## DATA BAR, COLOR SCALE &amp; ICON SET FORMATS

## Data Bars

Comparing two numbers in an Excel worksheet is easy, but it's difficult to compare multiple numbers with a quick glance.

- **Data bar conditional format:** Formatting that displays a color bar in the background of a cell so you can quickly compare the relative magnitude of values in a list.
- The length of the data bar represents the size of that cell's value in relation to the other cells to which you applied the conditional format.

## Create a data bar conditional format:

- Display the **Conditional Formatting** list.
- Point to **Data Bars**.
- Click the format you want to apply.

## Types of Data Bars

- **Gradient Fill format:**
  - Gradually change from a solid fill at the left edge of the cell to white as the data bar goes across the cell
  - Were introduced in Excel 2007
- **Solid Fill format:**
  - Remain a solid color for the entire length of the data bar
  - Were added to Excel 2010 after user feedback indicated Gradient Fill data bars were hard to interpret.

| Year | Sales        |
|------|--------------|
| 2019 | \$ 1,300,000 |
| 2020 | \$ 2,900,000 |
| 2021 | \$ 1,850,000 |

- Display the **Conditional Formatting** list.
- Point to **Data Bars**.

- Point to **Data Bars**.
- Click **More Rules**.
- Go to the **New Formatting Rule** dialog box.
- Click the **Negative Value and Axis** button.

- Go to the **Negative Value and Axis Settings** dialog box.
- Click the **Fill Color** button and select a fill color for negative values.

## OR

- Select the **Apply same fill color as positive bar** option.
- In the **Axis** settings section of the dialog box, select any of these options to position the axis separating positive and negative values:
  - **Automatic** (display at variable position based on negative values)
  - **Cell midpoint**
  - **None** (show negative values in the same direction as positive)
- Click the **Axis color** button and select a color for the axis.
- Click **OK** twice to close the dialog boxes.

## Color Scales

Color scales use gradually changing colors, called **gradients**, to represent changes in cell values.

**EX:** A color scale that displays cells with small values in white and larger values in red would fill the background of the cell that contains the smallest value with a pure white background and add bits of red to represent larger values. The cell that contains the largest value in the range would have a background of pure red.

## Create a color scale conditional format:

- Display the **Conditional Formatting** list.
- Point to **Color Scales**.
- Click the format you want to apply.

**NOTE:** You can select two-color or three-color **Color Scales**. If your data falls into two distinct ranges, use a **two-color scale**. If your data falls into three distinct ranges, such as poor, fair, and good performance, use a **three-color scale**.

| Hour | Station 1 | Station 2 | Station 3 | Station 4 |
|------|-----------|-----------|-----------|-----------|
| 1    | 13        | 52        | 89        | 79        |
| 2    | 58        | 74        | 37        | 32        |
| 3    | 9         | 14        | 84        | 15        |
| 4    | 8         | 31        | 43        | 52        |

- Click **More Rules**.
- Go to the **New Formatting Rule** dialog box.
- Click the **Minimum column's Color** control's down arrow.

- Click the color you want to apply.
- Click **OK**.

## Icon Sets

- **Icon sets:** Collections of small graphics, or icons, that visually represent how the contents of a worksheet cell compare to a set of criteria you define.
- Quick visual summaries are perfect for dashboards and worksheets that summarize an organization's operational data in relation to metrics established by the organization.
  - Most dashboards use a variation of green, yellow, and red traffic lights to indicate good, fair, and poor performance.

## Create an icon set conditional format:

- Display the **Conditional Formatting** list.
- Point to **Icon Sets**.
- Click the format you want to apply.

| Month    | On-Time % |
|----------|-----------|
| January  | 83        |
| February | 72        |
| March    | 94        |
| April    | 70        |

- Point to **Icon Sets**.
- Click **More Rules**.
- Go to the **New Formatting Rule** dialog box.
- Click the first **Type** list box's down arrow.
- Click **Number**.

If you change the **Value** and comparison operators and then change the type to **Number**, Excel will reset the comparison operator and contents of the **Value** box.

- Click the first comparison operator list box's down arrow.
- Select the operator to use in the comparison.
