Middle School Decision Making Activities:

Decision-making Skills for Middle School Students Sherrel Bergmann, Gerald J. Rudman, 1985-01-01 Early adolescence is a time when students require adult assistance to become accurate and effective decision makers and problem solvers. Because of the fragmented nature of society the family structure and the schooling process schools need to establish a nonthreatening environment in which students can discuss the issues related to growing up. A decision making course in the middle school can become that program. Results of the first six years of the decision making course at Elm Place Middle School in Highland Park Illinois are described illustrating a definite positive response on the part of all students. The logistics for designing and implementing such a program in the middle school are discussed. Teaching strategies projects and activities are outlined. Sample activities are appended along with sample communications to parents and students. JD

The Effects of the Washington State Education Reform on Schools and Classrooms, 2000 Researchers from RAND are studying the implementation and impact of the Washington reform on school and classroom practices focusing on the subjects of writing and mathematics. This briefing presents findings from the first round of surveys administered to teachers and principals in the spring of 1999. At this time elementary schools had already administered the Washington Assessment of Student Learning WASL for two years voluntary in 1996-97 and mandatory in 1997-98 and middle schools had administered the test for one year voluntary in 1997-98. Thus the results describe principals and teachers early responses to the state education reform. The findings are based on principal and teacher self reports about actions taken in their districts schools and classrooms as well as their opinions about the reform *Social Decision Making/social Problem Solving for Middle School Students* Maurice J. Elias, Linda Bruene Butler, 2005 School counseling staff as well as teachers and others running advisory or related groups will find this manual to be useful for helping students succeed in middle school. At this critical point in their lives young adolescents can move in a positive and hopeful direction or they can enter into a negative downward spiral. SDM SPS provides students with basic school survival skills and research based strategies for responsible decision making and problem solving. SDM SPS uses a positive project oriented approach to help reduce school violence, foster social and emotional intelligence, improve academic effort and attention, develop multicultural perspectives and prevent at risk students from giving up on school. The authors present a thoroughly tested and effective approach for working with a broad spectrum of learners including those with emotional and behavioral disorders. The manual includes numerous
