Creating Responsible and Inclusive Fashion Brand Narratives Emily Huggard, 2025-09-05 This book introduces the theories and frameworks necessary to drive meaningful social change in fashion brand communication illustrating their applications with examples of brands that prioritize social justice decolonization and environmental sustainability in their practices and communication strategies Drawing on social consumer and cultural theories such as Indigenous dress theory circularity fat liberation and social reproduction this book encourages students to think critically about brand communication in ways that are relevant impactful and aimed at transforming discourse and ideologies rather than focusing solely on products Through case studies ranging from Polo Ralph Lauren s collaboration with Indigenous weaver Naomi Glasses to material regeneration at Veja the authors demonstrate how these narratives can be applied in

practice while raising ethical questions about transparency and authenticity in fashion brand messaging Readers will not only gain an understanding of why more inclusive and equitable brand narratives are essential but also develop the knowledge and critical thinking skills needed to analyze interpret and contribute to the ongoing transformation of fashion brand storytelling Creating Responsible and Inclusive Brand Narratives will be of interest to advanced students of Fashion Communication Marketing and Brand Management

### **Exploring Blockchain Applications** Sezer Bozkus

Kahyaoglu,Vahap Tecim,2024-05-07 In this book the development process of blockchain algorithms and examples of their applications in different sectors are explored The opportunities and challenges of blockchain implementations that arise in making technological innovations usable in corporate structures are discussed In this respect the book aims to deal with both the conceptual framework and the real challenges and opportunities encountered in practice regarding the blockchain applications It is tried to contribute to the literature by presenting practical blockchain application suggestions to the readers on a scientific basis It is a fact that blockchain technology is considered one of the most disruptive and revolutionary innovations after the invention of the internet Blockchain technology which was first used for cross border payments is coming up with a new application area in a different sector every day The main purpose of Blockchain based systems is to spread the trust service provided by a central intermediary to machines in transactions between two parties Thus it removes the need for this trust from the monopoly of a single intermediary Blockchain implementation scenarios are to establish math based trust in an untrusted environment While exploring the complexity of blockchain applications in different sectors the emerging risks are also examined from a management perspective In particular it is aimed to be a key work that the management levels of the enterprises can benefit from in the decision making processes It will be seen that blockchain technologies will be used unlimitedly in design planning management and decision making This book will also introduce new visions for practitioners to use different blockchain technologies and methodologies to face problems
