Luxury Marketing and Brand Strategy Květa Olšanová, Gina Cook, Marija Zlatić, 2025-09-02 This text provides a comprehensive and strategic overview of luxury marketing and brand management guiding brands to balance tradition with innovation as they navigate modern challenges and seize opportunities in a rapidly evolving global market. The book explores the core aspects of luxury branding including the defining traits of luxury brands, the dominance of major luxury groups and the resilience of independent brands with storied histories. It explores the delicate balance required to maintain a brand's luxury status amidst evolving consumer expectations, technological advancements and sustainability concerns. Students will gain insight into innovative marketing strategies from the use of NFTs and blockchain to the integration of AI and the metaverse in enhancing customer experiences. Offering a clear and engaging pathway through the complexities of luxury brand management, the authors draw on their extensive academic and professional experience presenting a rich blend of theoretical insights and real world global and cross industry case studies from prestigious brands like Cartier, Van Cleef & Arpels, Chanel, Ferrari, Orient Express and many others. This textbook is designed to be the cornerstone for advanced undergraduate and postgraduate courses in luxury marketing and luxury brand management. With a focus on the latest trends and future directions in luxury marketing, *Luxury Marketing and Brand Strategy* is not only an academic resource but also a practical guide for navigating and succeeding in the dynamic luxury market. Online resources include PowerPoint lecture slides for each chapter, sample answers for discussion questions and a test bank. Please visit www.routledge.com/9781032973951

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD2022 Summer) which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.

Startup Finance 2.0 Sam Ghosh, 2025-08-29 Traditional corporate financial theories and tools are based on matured companies with the assumption that the companies are going concerns. Going Concern refers to the assumption that a

company will continue to operate indefinitely with no intention or necessity of liquidation or cessation of operations in the foreseeable future. The problem is that the Going Concern assumption does not hold for startups due to the inherent uncertainty associated with startups. Traditional financial education and resources usually meant for analysts and accountants aren't ideal for entrepreneurs. They focus on analyzing past data from established businesses not on making forward looking decisions in the uncertain and highly dynamic environment of startups. Entrepreneurs also often struggle to prioritize the allocation of resources between seemingly urgent matters and matters that are important for the long term value of the startup. Thus this book takes a value oriented approach to startup finance. The book is designed to build the financial intuition that an entrepreneur needs to prioritize matters vital for the long term value of the company, raise capital and allocate capital for value maximization. It also looks at finance from a value creation point of view and covers specific methods especially suited for startups from investment assessment to valuation to fundraising to managing day to day finances.

Distributed and Parallel Computing Sandhya Avasthi, Suman Lata Tripathi, 2025-12-11. Master the growing field of distributed and parallel computing with this essential guide offering expert insights into the fundamentals and real world applications for intelligent and collaborative systems. Distributed computing or running programs across multiple computers over a network is becoming a popular solution for addressing the demands for increased performance across industries including scientific computing, oil exploration, biotechnology and medicine. Distributed computing enables seamless communication and collaboration by allowing users from different locations to access and interact with their digital twin simultaneously. Distributed computing enhances the capabilities of digital twins by providing scalability, parallel processing, real time data integration, collaboration support, resource optimization, fault tolerance and security features. Distributed and Parallel Computing explores the fundamentals and innovations in intelligent and distributed computing systems and applications including adaptivity and learning agents and multi agent systems, argumentation, case based reasoning and collaborative systems. Through expert insights readers will discover promising real world applications for this emerging technology.

Consumer Behaviour Jean-Eric Pelet, 2025-03-03. With this textbook students will learn the concepts, theories and processes of consumer behaviour and how to apply them in a digitalized and competitive business landscape. Consumer Behaviour combines theoretical underpinnings with real world practice to provide comprehensive up to date coverage of the subject. It explores how consumer behaviour has evolved with the impact of technology, personalization and sustainability on perception and decision making. This textbook is ideal for postgraduate students taking modules on Consumer Behaviour as part of their Marketing degrees. Features include Chapters on the psychological and social dynamics of consumer behaviour and the scientific foundations of learning and memory in brand engagement. Examination of the role of AR, VR and the metaverse in retail experiences, live streaming and voice commerce as well as quantum computing and the importance of good UX design. Ethical considerations of the digital consumer landscape including privacy and data concerns. Learning
