United States v. Apple Chris Sagers,2019-09-17 One of the most followed antitrust cases of recent times United States v Apple reveals an often missed truth what Americans most fear is competition itself In 2012 the Department of Justice accused Apple and five book publishers of conspiring to fix ebook prices The evidence overwhelmingly showed an unadorned price fixing conspiracy that cost consumers hundreds of millions of dollars Yet before during and after the trial millions of Americans sided with the defendants Pundits on the left and right condemned the government for its decision to sue decrying Amazon s market share railing against a new high tech economy and rallying to defend beloved authors and publishers For many Amazon was the one that should have been put on trial But why One fact went unrecognized and unreckoned with in practice Americans have long been ambivalent about competition Chris Sagers a renowned antitrust expert meticulously pulls apart the misunderstandings and exaggerations that industries as diverse as mom and pop grocers and producers of cast iron sewer pipes have cited to justify colluding to forestall competition In each of these cases antitrust law a time honored vehicle to promote competition is put on the defensive Herein lies the real insight of United States v Apple If we desire competition as a policy we must make peace with its sometimes rough consequences As bruising as markets in their ordinary operation often seem letting market forces play out has almost always benefited the consumer United States v Apple shows why supporting cases that protect price competition even when doing so hurts some of us is crucial if antitrust law is to protect and maintain markets

Material Synthesis Achim Menges,2015-11-02 Material Synthesis Fusing the Physical and the Computational Guest edited by Achim Menges A new understanding of the material in

architecture is fast emerging. Designers are no longer conceiving of the digital realm as separate from the physical world. Instead, computation is being regarded as the key interface for material exploration and vice versa. This represents a significant perceptual shift in which the materiality of architecture is no longer seen to be a fixed property and passive receptor of form but is transformed into an active generator of design and an adaptive agent of architectural performance. In stark contrast to previous linear and mechanistic modes of fabrication and construction, materialisation is now beginning to coexist with design as explorative robotic processes. This represents a radical departure from both the trite modernist emphasis on truth to materials and the dismissal of materials by the previous generation of digital architects. The issue features designers, researchers and thinkers that are at the forefront of exploring new modes of material enquiry and its deep interrelationship with technology, biology and culture. Through their work, which unfolds from multifaceted alliances between the fields of design, engineering and natural sciences, it seeks to trace the emergence of a novel material culture in architecture. Architectural and engineering contributors include Sean Ahlquist, Martin Bechthold, Philippe Block, Karola Dierichs, Jan Knippers, Achim Menges, Neri Oxman, Steffen Reichert and Tobias Schwinn. Scientific and philosophical perspectives are provided by Mario Carpo, Manuel De Landa, Neil Gershenfeld and Thomas Speck. Features the design research of Harvard's Material Processes and Systems Group, MIT's Mediated Matter Group and Stuttgart University's Institute for Computational Design.

Hospitality Technology, 2010 **The New York Times Magazine**, 2011 **Re-Imagining the Avant-Garde** Matthew Butcher, Luke C. Pearson, 2019-08-05. The 1960s and 1970s avant garde has been likened to an architectural Big Bang such was the intensity of energy and ambition in which it exploded into the postwar world. Marked out by architectural projects that redefined the discipline, it remains just as influential today. References to the likes of Archizoom, Peter Eisenman, John Hejduk and Superstudio abound. Highly diverse, the avant garde cannot be defined as a single strand or tendency. It was divergent geographically, reaching from Europe to North America and Japan, and in its political, formal and cultural preoccupations. It was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval: the Paris riots of May 1968, the anti-Vietnam war movement in America and the looming ecological crisis. Re-imagining the Avant garde outlines how, in contemporary architectural practice, avant garde projects retain their power as historical precedents, as barometers of a particular design ethos, as critiques of society and instigators of new formal techniques. Given the far-reaching impact of the subsequent digital revolution, which has since reshaped every aspect of practice, the issue asks why this historical period continues to retain its undeniable grip on current architecture. Contributors: Pablo Bronstein and Sam Jacob, Sarah Deyong, Stylianos Giamarellos, Damjan Jovanovic, Andrew Kovacs, Perry Kulper, Igor Marjanovic, William Menking, Michael Sorkin, Neil Spiller and Mimi Zeiger. Featured architects: Archizoom, Andrea Branzi, Jimenez Lai, Luis Miguel Koldo Lus Arana, Klaus NEMESTUDIO, Superstudio and UrbanLab.
