**The Arts and the Teaching of History** Penney Clark, Alan Sears, 2020-08-26 This book closely examines the pedagogical possibilities of integrating the arts into history curriculum at the secondary and post secondary levels. Students encounter expressions of history every day in the form of fiction, paintings and commemorative art as well as other art forms. Research demonstrates it is often these more informal encounters with history that define students' knowledge and understandings rather than the official accounts present in school curricula. This volume will provide educators with tools to bring together these parallel tracks of history education to help enrich students' understandings and as a mechanism for students to present their own emerging historical perspectives.

**Knowing History in Schools** Arthur Chapman, 2021-01-07 The knowledge turn in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education and to the need for new thinking about how we understand knowledge and knowledge building. *Knowing History in Schools* explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's powerful knowledge theorisation of the curriculum and on his more recent articulations of the powers of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge building in history education. Crucially it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that knowledge building processes pose for learning history in schools.

**Education in the Global City** Aaron Koh, Terence Chong, 2017-10-02 *Education in the Global City* examines education in Singapore through the critical lens of manufacturing. The book brings together two disparate fields which inform each other: education and the global city and the book's contributors analyse and critique the manufacturing of Singapore education and Singapore's global city formation. The collection covers vocational education, language policies, Higher Education, English education, critical thinking, sex education, creativity and critical feminist scholarship. Collectively the book pries open the ideology of the manufacturing education system and points out the tension between the nation and its ideologies and the global city aspirations. It also asks how education contributes to and is shaped by the market realities of Singapore's global city ambitions which are at odds with the nationalistic local agenda and priorities of nation building. In interrupting and speaking against the prevailing and narrow manufacturing of education for a teleological end in spite of Singapore's successful nation building, this book is an important contribution to critical education scholarship. This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education*. **Africa South of the Sahara 2003** Europa Publications, 2002-10-31 A one volume library of essential and comprehensive data on all the countries of sub-Saharan Africa including essays on regional issues, statistical surveys and directories of invaluable contact names and
