Online Point Making Sense Everything Between:

ON/OFF Sarah Genner, 2017-01-03 Are you constantly online Or are you offline sometimes Are you offline if you are not interacting with your connected devices Or if no data about you is being collected Do you check Instagram and Twitter during dinner Do you turn off your smartphone at night Do you check work emails on vacation Do you feel you have to disconnect regularly to relax to concentrate or to protect your privacy Or do you feel more relaxed when constantly connected because your loved ones a work emergency or the news are always at your fingertips Why are some people even within networked societies still completely offline given the tremendous opportunities of the Internet And what does it even mean to be online or offline in the age of hyper connectivity In *ON OFF* Sarah Genner assesses the risks and rewards of the anytime anywhere Internet focusing on digital divides social relationships physical and mental health and data privacy She discusses implications for a variety of decision makers in the world of work in education in families and in politics The author deconstructs the online offline dichotomy and suggests the ON OFF scale as a new theoretical framework for researchers and practitioners

Untangling the Web Aleks Krotoski, 2013-05-20 The World Wide Web is the most revolutionary innovation of our time In the last decade it has utterly transformed our lives But what real effects is it having on our social world What does it mean to be a modern family when dinner table conversations take place over smartphones What happens to privacy when we readily share our personal lives with friends and corporations Are our Facebook updates and Twitterings inspiring revolution or are they just a symptom of our global narcissism What counts as celebrity when everyone can have a following or be a paparazzo And what happens to relationships when love sex and hate can be mediated by a computer Social psychologist Aleks Krotoski has spent a decade untangling the effects of the Web on how we work live and play In this groundbreaking book she uncovers how much humanity has and hasn't changed because of our increasingly co dependent relationship with the computer In *Untangling the Web* she tells the story of how the network became woven in our lives and what it means to be alive in the age of the Internet Head First Mobile Web Lyza Danger Gardner, Jason Grigsby, 2011-12-22 Mobile web usage is exploding Soon more web browsing will take place on phones and tablets than PCs Your business needs a mobile strategy but where do you start *Head First Mobile Web* shows how to use the web technology you're already familiar with to make sites and apps that work on any device of any size Put your JavaScript CSS media query and HTML5 skills to work and then optimize your site to perform its best in the demanding mobile market Along the way you'll discover how to adapt your business strategy to target specific devices Navigate the increasingly complex mobile landscape Take both technical and strategic approaches to mobile web design Use the latest development techniques including Responsive Web Design and server side device detection with WURFL Learn quickly through images puzzles stories and quizzes We think your time is too valuable to waste struggling with new concepts Using the latest research in cognitive science and learning theory to craft a multi sensory learning experience *Head First Mobile Web* uses a visually rich format designed for the way your brain works not a text heavy approach that puts you to sleep **Collections of US** Dr. Henry Garrett, 2023-02-01 In this research book there are some research chapters on Collections of US With researches on the basic properties the research book starts to make Collections of US more understandable Some studies
