Textbooks on Israel-Palestine Seyed Hadi Borhani, 2023-09-21 How is the Israel Palestine question narrated in Western academia What ideas dominate the key textbooks on the subject and what is presented as truth This book answers these critical questions It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine But academic support of Israel in the West has been a neglected issue with Western academic knowledge being regarded as impartial and objective This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel Palestine question Rather knowledge has been biased misleading and dogmatic and Western college students are subscribing to factual histories based on theories at best if not fiction The book is the first empirical investigation able to document this partial reporting of history Seyed Hadi Borhani examines the most popular college level textbooks used to teach the history of the Israel Palestine in Western universities combining textbook analysis to determine how the dominant academic texts report the question and a context analysis to identify who manufactures the dominant knowledge The book provides a historical map of how the Israel Palestine conflict is understood in the West The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much needed intervention into the state of affairs in Western academia

Teaching in the Middle and Secondary Schools Richard Dean Kellough,Jeanne Carjuzaa,2009 This practical performance based methods text for middle and secondary school pre-service teachers is organized around four developmental components. Why gives the rationale to support the components that follow. What what you will be teaching. How how you will teach it. How well how well you are teaching it. Organized into four parts that are then split up into ten modules the text begins with a history of education going back to colonial times. The modules then cover the many and varied aspects of teaching pre and early adolescents such as teaching students with exceptionalities, classroom management, diversity, instructional planning using technology in the classroom, assessing student achievement and self assessment and continued professional development. The authors contend that the best teacher is one who has an eclectic style and can monitor their own progress and make changes and adapt their strategies if they are not succeeding. The ninth edition has been carefully updated to reflect the diversity and current topics in the field today. The book is a valuable resource for students today and as a reference for many years to come. New To This Edition: NEW Improved balance of content between middle and secondary schools; this emphasizes that middle school is uniquely different from both high school and the traditional junior high school; and that pre and early adolescence is different from late adolescence. NEW Technology has been integrated throughout every module of the book. New features including Teaching Scenarios, Activities and Technology. Rich features were added to all modules. NEW Contributions from pre-service and in-service middle and secondary school teachers, teacher educators and educational researchers have been added to strengthen the tie between theory and practice. **Publishers Directory** ,2002
