Technology Review, 1995 **Edtech for Multilingual Learners** Brent Warner, 2025 This friendly, accessible book offers dozens of creative activities to help teachers use edtech tools to engage their students in the language learning process. Many teachers of multilingual students could improve learning outcomes through the use of education technology but don't have time for in-depth professional development that would help them in their work in this area. This book fills that gap, offering guidance and inspiration to teachers of English as a Second or Other Language (ESOL) as well as to educators in other disciplines who work with multilingual learners. Organized by six key language acquisition skills: reading, writing, speaking, listening, vocabulary, and pronunciation, each chapter features eight to twelve activities to engage students and facilitate language learning. The activities are tech-driven yet flexible enough to adapt to the needs of different classroom settings. While some specific tools are discussed, the book shows teachers how to make the activities work with the technology they have available. The book includes links to ready-to-use slide decks for every activity. Offers a knowledgeable and thoughtful introduction to using AI with language learners. Features a backward design pedagogical approach in which each activity has an end goal in mind and is then developed to incorporate appropriate and effective tools. Is accompanied by the ELT Toolkit, a searchable online database of edtech tools for English language teachers hosted by TESOL International Association. Includes connections to the ISTE Standards in every chapter. Based on research-backed practices, this book's fun and practical approach will help busy teachers leverage technology to make the language learning process more fun and effective for their students. Audience: Secondary and higher ed TESOL educators and teachers working with ESL students.

Explainable AI in Healthcare Mehul S Raval, Mohendra Roy, Tolga Kaya, Rupal Kapdi, 2023-07-17 This book combines technology and the medical domain. It covers advances in computer vision CV and machine learning ML that facilitate automation in diagnostics and therapeutic and preventive health care. The special focus on eXplainable Artificial Intelligence XAI uncovers the black box of ML and bridges the semantic gap between the technologists and the medical fraternity. Explainable AI in Healthcare Unboxing Machine Learning for Biomedicine intends to be a premier reference for practitioners, researchers and students at basic intermediary levels and expert levels in computer science, electronics and communications, information technology, instrumentation and control and electrical engineering. This book will benefit readers in the following ways: Explores state of art in computer vision and deep learning in tandem to develop autonomous or semi autonomous algorithms for diagnosis in health care. Investigates bridges between computer scientists and physicians being built with XAI. Focuses on how data analysis provides the rationale to deal with the challenges of healthcare and making decision making more transparent. Initiates discussions on human AI relationships in health care. Unites learning for privacy preservation in health care.

Showmen's Motion Picture Trade Review, 1949 **Mathematical Reviews**, 2006 **Situated Language and Learning** James Paul Gee, 2004 Why do poor and minority students under perform in school? Do computer games help or hinder learning? What can new research in psychology teach our educational policy makers? In this major new book Gee tackles the big ideas about language literacy and learning, putting forward an integrated theory that crosses disciplinary boundaries and applying it to some of the very real problems that face educationalists today. Situated Language and Learning looks at the specialist academic varieties of language that are used in disciplines such as mathematics and the sciences. It argues that the language acquisition process needed to learn these forms of language is not given enough attention by schools and that this places unfair demands on poor and minority students. The book compares this with learning as a process outside the classroom, applying this idea to computer and video games and exploring the particular processes of learning which take place as a child interacts with others and technology to learn and play. In doing so Gee examines what video games can teach us about how to improve learning in schools and engages with current debates on subjects such as communities of practice and digital literacies. Bringing together the latest research from a number of disciplines, Situated Language and Learning is a bold and controversial book by a leading figure in the field and is essential reading for anyone interested in education and language.

Barriers to Adoption of Artificial Intelligence in Metal Additive Manufacturing Wayne E. King, 2025-01-14 Artificial intelligence AI is poised to significantly impact metal additive manufacturing AM. Understanding how one might use AI in AM is challenging because AM experts are not AI experts nor the other way around. This document introduces AI in AM and guides researchers in accessing relevant literature.
