Learning Experiences To Promote Mathematics Learning: Yearbook 2014, Association Of Mathematics Educators Pee Choon Toh, Tin Lam Toh, Berinderjeet Kaur, 2014-05-27 This sixth volume in the series of yearbooks by the Association of Mathematics Educators in Singapore entitled Learning Experiences to Promote Mathematics Learning is unique in that it focuses on a single theme in mathematics education The

objective is for teachers and researchers to advance the learning of mathematics through meaningful experiences. Several renowned international and Singapore scholars have published their work in this volume. The fourteen chapters of the book illustrate evidence-based practices that school teachers and researchers can experiment with in their own classrooms to bring about meaningful learning outcomes. Three broad themes, namely fundamentals for active and motivated learning, learning experiences for developing mathematical processes, and use of ICT tools for learning through visualizations, simulations, and representations, shape the ideas in these chapters. The book makes a significant contribution towards the learning of mathematics. It is a good resource for mathematics teachers, educators, and research students.

Physical Activity and Health Promotion in the Early Years Hannah Brewer, Mary Renck Jalongo, 2018-06-19. This book focuses on improving well-being among young children. It provides a theoretical base explaining why physical activity is important and offers practical strategies for increasing health and well-being in early childhood settings. It takes ancient wisdom on the mind and body connection, applies it to the youngest children, and supports it with current empirical and international evidence, all with an eye toward improving wellness across the lifespan. The many topics discussed in the book include children's motor skills, movement, interaction, physical literacy, the use of video games, dog ownership, developmental delays, as well as strategies to improve physical activities in the classroom and broader contexts. In recent years, children's health has become a priority worldwide. Topics such as screen time, sedentary behavior, and childhood obesity have become important issues everywhere in the news, in schools, in community and commercial settings, and among health care providers. Limiting sedentary behavior, increasing physical activity, and maintaining a nutritious diet are three fundamental needs during early childhood. Preschool years are a time when children begin to explore the world around them and develop more vivid understandings of their surroundings. As this book shows, the early years may be the best time to teach wellness concepts and assist young children in establishing healthy lifestyle habits.
