Pardalos, Javier Sanchis Sáez, 2019-09-20 This volume presents some recent and principal developments related to computational intelligence and optimization methods in control Theoretical aspects and practical applications of control engineering are covered by 14 self contained contributions Additional gems include the discussion of future directions and research perspectives designed to add to the reader's understanding of both the challenges faced in control engineering and the insights into the developing of new techniques With the knowledge obtained readers are encouraged to determine the appropriate control method for specific applications

**Applications of Soft Computing for the Web** Rashid Ali, MM Sufyan Beg, 2018-01-08 This book discusses the applications of different soft computing techniques for the web based systems and services The respective chapters highlight recent developments in the field of soft computing applications from web based information retrieval to online marketing and online healthcare In each chapter author endeavor to explain the basic ideas behind the proposed applications in an accessible format for readers who may not possess a background in these fields This carefully edited book covers a wide range of new applications of soft computing techniques in Web recommender systems Online documents classification Online documents summarization Online document clustering Online market intelligence Web usage profiling Web data extraction Social network extraction Question answering systems Online health care Web knowledge management Multimedia information retrieval Navigation guides User profiles extraction Web based distributed information systems Web security applications Internet of Things Applications and so on The book is aimed for researchers and practitioner who are engaged in developing and applying intelligent systems principles for solving real life problems Further it has been structured so that each chapter can be read independently of the others

**Advances in Computational Intelligence in Transport, Logistics, and Supply Chain Management** Andreas Fink, Franz Rothlauf, 2008 The book at hand presents a careful selection of relevant applications of CI methods for transport logistics and supply chain management problems The chapters illustrate the current state of the art in the application of CI methods in these fields and should help and inspire researchers and practitioners to apply and develop efficient methods A few contributions in this book are extended versions of papers presented at EvoTransLog2007 The First European Workshop on Evolutionary Computation in Transportation and Logistics which was held in Valencia Spain in 2007 The majority of contributions are from additional specially selected researchers who have done relevant work in different areas of transport logistics and supply chain management The goal is to broadly cover representative applications in these fields as well as different types of solution approaches On the application side the contributions focus on design of traffic and transportation networks vehicle routing and other important aspects of supply chain management such as inventory management lot sizing and lot scheduling On the method side the contributions deal with evolutionary algorithms local search approaches and

scatter search combined with other CI techniques such as neural networks or fuzzy approaches The book is structured according to the application domains Thus it has three parts dealing with traffic and transportation networks vehicle routing and supply chain management      *Emergent Web Intelligence: Advanced Information Retrieval* Richard Chbeir, Youakim Badr, Ajith Abraham, Aboul-Ella Hassanien, 2010-03-10 This volume reviews cutting edge technologies and insights related to XML based and multimedia information access and data retrieval And by applying new techniques to real world scenarios it details how organizations can gain competitive advantages      Handbook of Research on Advancements of Swarm Intelligence Algorithms for Solving Real-World Problems Cheng, Shi, Shi, Yuhui, 2020-04-24 The use of optimization algorithms has seen an emergence in various professional fields due to its ability to process data and information in an efficient and productive manner Combining computational intelligence with these algorithms has created a trending subject of research on how much more beneficial intelligent inspired algorithms can be within companies and organizations As modern theories and applications are continually being developed in this area professionals are in need of current research on how intelligent algorithms are advancing in the real world The Handbook of Research on Advancements of Swarm Intelligence Algorithms for Solving Real World Problems is a pivotal reference source that provides vital research on the development of swarm intelligence algorithms and their implementation into current issues While highlighting topics such as multi agent systems bio inspired computing and evolutionary programming this publication explores various concepts and theories of swarm intelligence and outlines future directions of development This book is ideally designed for IT specialists researchers academicians engineers developers practitioners and students seeking current research on the real world applications of intelligent algorithms      **Data Mining and Multi-agent Integration** Longbing Cao, 2009-07-25 Data Mining and Multi agent Integration aims to reflect state of the art research and development of agent mining interaction and integration for short agent mining The book was motivated by increasing interest and work in the agents data mining and vice versa The interaction and integration comes about from the intrinsic challenges faced by agent technology and data mining respectively for instance multi agent systems face the problem of enhancing agent learning capability and avoiding the uncertainty of self organization and intelligence emergence Data mining if integrated into agent systems can greatly enhance the learning skills of agents and assist agents with predication of future states thus initiating follow up action or intervention The data mining community is now struggling with mining distributed interactive and heterogeneous data sources Agents can be used to manage such data sources for data access monitoring integration and pattern merging from the infrastructure gateway message passing and pattern delivery perspectives These two examples illustrate the potential of agent mining in handling challenges in respective communities There is an excellent opportunity to create innovative dual agent mining interaction and integration technology tools and systems which will deliver results in one new technology      Cognitive Multitasking – Towards Augmented Intelligence Yew Soon Ong, Liang Feng, Huajin Tang, Will Neil
