Enterprise, Business-Process and Information Systems Modeling Renata Guizzardi, Luise Pufahl, Arnon Sturm, Han van der Aa, 2025-06-13 This book constitutes the refereed proceedings of two long running events held along with the CAiSE conference and related to the areas of enterprise business process and information systems modeling the 26th International Conference on Business Process Modeling Development and Support BPMDS 2025 and the 30th International Conference on Exploring Modeling Methods for Systems Analysis and Development EMMSAD 2025 The conferences were taking place in Vienna Austria during June 16-17 2025 For BPMDS 12 full papers were carefully reviewed and selected for publication from a total of 39 submissions The BPMDS papers deal with a broad range of

theoretical and applications based research in business process modeling development and support For EMMSAD 13 full papers and 3 short papers were accepted from a total of 37 submissions after thorough reviews EMMSAD focusses on modeling methods for systems analysis and development Simulating Information Retrieval Test Collections David Hawking, Bodo Billerbeck, Paul Thomas, Nick Craswell, 2022-06-01 Simulated test collections may find application in situations where real datasets cannot easily be accessed due to confidentiality concerns or practical inconvenience They can potentially support Information Retrieval IR experimentation tuning validation performance prediction and hardware sizing Naturally the accuracy and usefulness of results obtained from a simulation depend upon the fidelity and generality of the models which underpin it The fidelity of emulation of a real corpus is likely to be limited by the requirement that confidential information in the real corpus should not be able to be extracted from the emulated version We present a range of methods exploring trade offs between emulation fidelity and degree of preservation of privacy We present three different simple types of text generator which work at a micro level Markov models neural net models and substitution ciphers We also describe macro level methods where we can engineer macro properties of a corpus giving a range of models for each of the salient properties document length distribution word frequency distribution for independent and non independent cases word length and textual representation and corpus growth We present results of emulating existing corpora and for scaling up corpora by two orders of magnitude We show that simulated collections generated with relatively simple methods are suitable for some purposes and can be generated very quickly Indeed it may sometimes be feasible to embed a simple lightweight corpus generator into an indexer for the purpose of efficiency studies Naturally a corpus of artificial text cannot support IR experimentation in the absence of a set of compatible queries We discuss and experiment with published methods for query generation and query log emulation We present a proof of the pudding study in which we observe the predictive accuracy of efficiency and effectiveness results obtained on emulated versions of TREC corpora The study includes three open source retrieval systems and several TREC datasets There is a trade off between confidentiality and prediction accuracy and there are interesting interactions between retrieval systems and datasets Our tentative conclusion is that there are emulation methods which achieve useful prediction accuracy while providing a level of confidentiality adequate for many applications Many of the methods described here have been implemented in the open source project SynthaCorpus accessible at <https://bitbucket.org/davidhawking/synthacorporus> Take Control of Siri, 3rd Edition Scholle McFarland, 2025-04-22 Make the most of Apple's digital assistant Version 3.0 updated April 22, 2025 When it comes to using your Apple devices Siri is the hands free time saving and fun technology that ties everything together Whether you want to ask a question make a call find your iPhone or set a timer not only can Siri do it but it usually offers the fastest way This book explores how to get the most out of Siri on your iPhone iPad Mac Apple Watch Apple TV and HomePod n Siri Apple's voice controlled digital assistant has been around since 2010 when it debuted on the iPhone But since then it has become vastly more powerful and useful and has
