by this are becoming personal assistants that give users an always connected and always on lifestyle. Users are able to do everything from everywhere at any time with it from doing business communicating or playing interactive games to shopping. The increasing number of mobile devices and by this the anywhere accessibility of the Internet have an impact on the consumers behavior in stationary stores. Customers do price checks with their smartphone watching product videos or reading product reviews in the store and more often buy the desired product elsewhere. Retailers face the challenge of understanding how customers interact with their mobiles while shopping and take advantage of any opportunities to increase customer conversion and gain loyal customers. comscore 2012 Customers expect mobile offerings. Today some retailers already respond to these demand and development and try with new possibilities of mobile marketing to bring customers back from digital world into their stores. KPMG 2012 38 but they have to add value to all their offering and products and even to new technological possibilities like mobile services which do not automatically generate advantages over competition. Rudolph Emrich 2008 266 Mobile services in retail are services that can be used independently of temporal and spatial restraints and that are accessed through a mobile device in retail environment like i.e. mobile couponing receiving or paying with mobile phone. When launching such a service the retailer has to be sure whether a mobile service has the power to influence customer satisfaction inside the store. Customer satisfaction is the important connection between activities of the retailer and the resulting behaviour like repeat purchasing, cross selling, recommendation or complaint and by this relevant for economical success of a company.
