## College Rankings Today:

*America's Best Colleges*, 1999      **American Best Colleges** Mortimer Zuckerman, 1997-09      **Assembly** West Point Association of Graduates (Organization), 1992      **Impact of Global University Ranking Systems on Developing Countries** Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01

The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries.

**Impact of Global University Ranking Systems on Developing Countries** presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.      **USA Today Index**, 1996      *India Today*, 2009      **Evaluating and Responding to College Guidebooks and Rankings** R. Dan Walleri, Marsha K. Moss, 1995-12-27

The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced, followed by discussion of major issues and perspectives, consumer use of the publications, validity of ratings, and the institutional burden of supplying the needed information. View from both the institutions and the publishers are presented. This is the 88th issue of the quarterly journal *New Directions for Institutional Research*. For more information on the series, please see the Journals and Periodicals page.      [Academic Quality Rankings of American Colleges and Universities](#) David S. Webster, 1986      *The Alumni Factor* The Alumni Factor, 2013-09-10

This book began with a simple premise that there is a better way to assess and rank colleges and universities in America than

those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today

ranking That can be bad for their students and for higher education Since U S News World Report first published a college  
ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's  
colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants  
to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive  
advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional  
diversity intellectual rigor and social mobility that is the genius of American higher education As a former university  
administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college  
rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings  
perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and  
prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of  
distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions  
scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means  
necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and  
educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately  
he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and  
perpetuates social inequality      The Guardian Index ,2002
