Chimpanzee Culture Wars Nicolas Langlitz,2020-09-08 Decades later starting in the 1980s Japanese cultural primatology was given a second look as Euro American primatologists began to debate amongst themselves the question of whether *Homo sapiens* is the only cultural animal In the most recent chapter of this controversy field researchers such as the Swiss primatologist Christophe Boesch have accused experimental psychologists such as Michael Tomasello of underestimating and even denying the capacity of chimpanzees for culture because they limit their studies to captive animals brought up under cognitively debilitating conditions and tested in laboratory settings bound to favor human test subjects with whom the animals are compared These controversies raise serious questions about what sort of laboratory culture is best for the study of primate cognition

Critical Kinship Studies Damien W. Riggs,Elizabeth Peel,2016-09-15 This book draws together research on posthumanism and studies of kinship to elaborate an account of western human kinship practices Studies of kinship have increasingly sought to critique the normative assumptions that often underpin how caring relationships between humans are understood The categorisation of human and kinship is brought into question and this book examines who might be excluded through adherence to accepted categories and how a critical lens may broaden our understanding of caring relationships Bringing together a diverse array of analytic foci and theoretical lenses Critical Kinship Studies opens up new avenues for understanding what it means to be in relationships with others and in so doing challenges the human exceptionalism that has often limited how we think about family loss love and subjectivity
