*Radically Human* Paul Daugherty, H. James Wilson, 2022-04-26 Technology advances are making tech more human. This changes everything you thought you knew about innovation and strategy. In their groundbreaking book *Human Machine*, Accenture technology leaders Paul R. Daugherty and H. James Wilson showed how leading organizations use the power of human machine collaboration to transform their processes and their bottom lines. Now as new AI powered technologies like the metaverse, natural language processing and digital twins begin to rapidly impact both life and work, those companies and other pioneers across industries are tipping the balance even more strikingly toward the human side with technology led strategy that is reshaping the very nature of innovation. In *Radically Human*, Daugherty and Wilson show this profound shift fast forwarded by the pandemic toward more human and more humane technology. Artificial intelligence is becoming less artificial and more intelligent. Instead of data hungry approaches to AI, innovators are pursuing data efficient approaches that enable machines to learn as humans do. Instead of replacing workers with machines, they're unleashing human expertise to create human centered AI. In place of lumbering legacy IT systems, they're building cloud first IT architectures able to continuously adapt to a world of billions of connected devices. And they're pursuing strategies that will take their place alongside classic winning business formulas like disruptive innovation. These against the grain approaches to the basic building blocks of business: Intelligence, Data, Expertise, Architecture, and Strategy. IDEAS are transforming competition. Industrial giants and startups alike are drawing on this radically human IDEAS framework to create new business models, optimize post pandemic approaches to work and talent, rebuild trust with their stakeholders and show the way toward a sustainable future. With compelling insights and fresh examples from a variety of industries, *Radically Human* will forever change the way you think about practice and win with innovation.

*The New Engineering Game* Tim Weilkiens, 2019-08-30 Adapt to a world of digitalization and get ready to become a successful player in the new engineering game. Key Features: Discover what the fourth industrial revolution is all about. Explore the new engineering game through the context of globalization, craftsmanship and interdisciplinary engineering. Develop strategies to improve the engineering of products with functional architecture, lean systems engineering and more. Book Description: Organizations today face an increasingly complex and dynamic environment whatever their market. This change requires new systems that are built on the foundation of a new kind of engineering and thinking. *The New Engineering Game* closes the gap between high level reflections about digitalization and daily engineering methods and tools. The book begins by describing the first three industrial revolutions and their consequences and by predicting the fourth industrial revolution. Considering the fourth industrial revolution, it explains the need for a new kind of engineering. The later chapters of the book provide valuable principles, patterns, methods and tools that engineering organizations can learn and use to succeed on the playfield of digitalization. By the end of the book, you'll have all the information you need to understand the various concepts to take your

first steps towards the world of digitalization What you will learn Deal with the challenges of Conway s Law Explore domains from different viewpoints with the Cynefin framework Use the Business Model Canvas BMC to view your business model in one chart Use the Business Model Navigator BMN to elaborate your business model Get an overview of RE Think 4 0 Discover how to apply the principles of the Agile Manifesto for Software Development in your projects Who this book is for This book is for those of you who want to want to gear up for the ever evolving and dynamic environment that has come into play with digitalization Anyone who wants to create industry grade applications using smart product engineering techniques will find this book useful To grasp all that has been explained in this book all you need is a knowledge seeking attitude

**Atlas of Green Energy Transitions** Matthew Seibert, 2026-01-27 This edited collection of scholars and activists employs immersive first person narrative descriptions and rich imagery to tell the oft revealing stories of contestation exploitation and complication within the landscapes upon which the world s green energy transition depends the unsanctioned cobalt mines of the Congo the solar farms clearing vast tracts of the Mojave Desert the scattered e waste operations of Zimbabwe among others Utilizing the global supply chain as an organizing structure working backwards from consumption to extraction and back again each chapter is framed around an abiotic protagonist crucial for the widespread adoption of renewable energy technologies Cast as our saviors in the face of climate change cobalt aluminum and the many critical minerals needed for solar panels wind turbines and electric vehicles are explored through the biophysical environments and cultural contexts in which they are extracted refined or deployed In challenge to these descriptive chapters are counternarratives that offer alternatives beyond silver bullet ecomodernism toward complicated futures built on just practices and reciprocity In grounding all chapters amid host landscapes the collection cultivates a heightened awareness of land relations and global interconnection The project thus not only engages the green energy transition a topic of accelerating importance and topical prevalence but uniquely exhibits the skills of landscape architectural practice to communicate environmental challenges of global proportions identify points of interdisciplinary intervention and craft compelling futures to catalyze change The book targets an audience of students and practitioners of the built environment while seeking to inspire the inner designer in all readers
