How to Stay Smart in a Smart World Gerd Gigerenzer,2022-08-02 How to stay in charge in a world populated by algorithms that beat us in chess find us romantic partners and tell us to turn right in 500 yards Doomsday prophets of technology predict that robots will take over the world leaving humans behind in the dust Tech industry boosters think replacing people with software might make the world a better place while tech industry critics warn darkly about surveillance capitalism Despite their differing views of the future they all seem to agree machines will soon do everything better than humans In How to Stay Smart in a Smart World Gerd Gigerenzer shows why that's not true and tells us how we can stay in charge in a world populated by algorithms Machines

powered by artificial intelligence are good at some things playing chess but not others life and death decisions or anything involving uncertainty Gigerenzer explains why algorithms often fail at finding us romantic partners love is not chess why self driving cars fall prey to the Russian Tank Fallacy and how judges and police rely increasingly on nontransparent black box algorithms to predict whether a criminal defendant will reoffend or show up in court He invokes Black Mirror considers the privacy paradox people want privacy but give their data away and explains that social media get us hooked by programming intermittent reinforcement in the form of the like button We shouldn't trust smart technology unconditionally Gigerenzer tells us but we shouldn't fear it unthinkingly either
