Research Methods for Product Design Alex Milton, Paul Rodgers, 2023-05-04 This book provides the reader with a comprehensive relevant and visually rich insight into the world of research methods specifically aimed at product designers. It includes practical case studies and tutorials that will inform, inspire and help you to conduct product design research better. Product designers need a comprehensive understanding of research methods as their day to day work routinely involves them observing people asking questions, searching for information, making and testing ideas and ultimately generating solutions to problems. Manifest in the design process is the act of research. Huge technological advances in information computing and manufacturing processes also offer enormous opportunities to product designers such as the development of intelligent products and services but at the same time raise important research questions that need to be dealt with. Product designers are in many ways best placed to address these challenges because of the manner in which they apply their design thinking to problems. This book demonstrates in a clear, highly visual and structured fashion how research methods can support product designers and help them address the very real issues the world currently faces in the 21st century.

Women's Writing in English Lorna Sage, 1999-09-30 This Guide aims to consolidate and epitomise the re-reading of women's writing that has gone on in the last twenty five years. This is an opportunity for stock-taking a timely project when so much writing has been rediscovered, reclaimed and republished. There are entries on writers, on individual texts and on general terms, genres and movements, all printed in a single alphabetical sequence. The earliest written documents in medieval English, the visionary writings of Julian of Norwich and Margery Kempe, are covered in an historical and geographical sweep that takes us up to the present day. The book reflects the spread of literacy, the history of colonisation and the development of post-colonial cultures, using and changing the English language. The entries are written by contributors from all the countries covered. The result is a work of reference with a unique feeling for the vitality, wealth and diversity of women's writing.
