**What determines green purchase behavior?** Zhongju Liao, Shufeng Xiao, Siying Long, 2024-05-31 Green purchase behavior refers to consumers purchasing green products that are environmentally friendly using fewer resources and causing lower environmental impact and risk. As a growing number of people start to recognize the importance of individual responsibility for environmental protection, firms are increasingly motivated to develop green products to fit the needs of this green advocacy. Despite an emerging number of consumers claiming their preference towards green brands compared to traditional alternatives, researchers have found that there is a huge gap between consumers' purchase intention and actual behavior, which has gained much attention. The psychological process of green purchase behavior may be a complicated process influenced by various factors such as consumer values and norms, the pros and cons marketed for green products, and various other situational factors. Scholars are calling for research that explores the psychological decision-making process of green purchase behavior from both theoretical and practical perspectives. Due to the high pricing of green products, the trade-off between the price and function of green products may lower consumers' satisfaction. Thus, there is always a gap between green purchase intention and actual purchase behavior. What determines consumers' actual green purchase behavior? Under what conditions will consumers pay a premium price for green products? What prompts consumers to choose green brands over traditional alternatives? Will green consumption be a passing trend or a long-term consumption habit? What influences the frequency of consumers' green purchasing? Scholars are welcome to share their opinions and findings about green purchase behavior to help explore this research topic. We are extremely interested in the determinants of green purchase behavior and the mechanism of facilitating green consumption, considering different perspectives.

, 1981 Vols for 1978 include an annual directory issue **Reimagining Capitalism in a Post-Globalization World** Silvia L. Fotea, Sebastian A. Văduva, Ioan ř. Fotea, 2024-09-01 In a world that is grappling with soaring energy costs, widespread inflation, armed conflicts, and the looming specter of trade wars, world leaders and pundits are actively seeking transformative paradigms to usher in a sense of stability. Many of them envisioning a reimagining of capitalism. This volume offers a unique Eastern European perspective on this phenomenon. Featuring select contributions presented at the 13th Annual Griffiths School of Management IT's Conference on Business Entrepreneurship and Ethics (GSMAC 2023), this book explores the future of innovation, digital entrepreneurship, digital leadership, and management, stakeholder capitalism, corporate social responsibility, among other areas. The enclosed research identifies challenges of the new social, economic, and technological paradigms companies are facing and offers concrete solutions. Electric Vehicle Progress, 2002 **Climate Change and Clean Energy Management** Henry Wang, 2019-10-22 Climate change has never been more important than it is now as it

has become arguably the world's most urgent problem. Solving this problem is proving difficult and complex as it involves joint efforts by governments, companies, communities and innovators. The increased use of fossil fuels associated with global economic growths has led to rising GHG emissions and global warming. There are many challenges for countries that are enacting new climate and clean energy regulations in line with their Paris Agreement commitments. Good government policies and corporate strategies are essential to support these efforts as part of the global climate change crisis. This important book addresses the latest climate change impacts and developments in potential mitigation strategies. These include fossil to clean energy transition, smart low carbon city designs, green transportation, electric vehicles, green agriculture, carbon emission trading, carbon capture solutions, plus climate finance and risk management. Potential new policies and strategies to support the successful implementation of these important strategic areas are discussed together with high level country and business case examples. This book is essential reading for policy makers, government employees, business executives, professionals, researchers and academics alike looking to affect change to global climate and energy policies.

[Ludicrous](#) Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype? Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry. But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor thin margins of mid priced sedans, Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans. In *Ludicrous*, journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces. Blending original reporting and never before published insider accounts with savvy industry analysis, Niedermeyer tells the story of Tesla as it's never been told before with clear eyes, objectivity and insight.
